	PAGE
Preface to Third Edition	xi
1. Introduction	1
✓ Growth of pollution	3
Control of pollution	4
Scope of the book	5
2. Origin of Fuel	6
Primeval fuel	6
Cellulose	8
Superior fuels	9
Quantity of fuel	10
Calorific value	10
Gross and net calorific value	15
World reserves and annual output	16
3. Natural Solid Fuels	18
Wood	18
Wood charcoal	19
Peat	19
The coal series	20
Lignite	21
Bituminous coal	22
Ash and sulphur in coal	26
Washed coal	27
Coal hazards	28
4. Mineral Oils and Gases	30
Petroleum	30
The refining process	32
Characteristics of fuel oils	33
Preparation for burning: burners	37
Vaporizing burners	38
Pressure jet burners	39
Recent developments	40
Natural gas	42

	PAGE
5. Manufactured Fuels	44
History	44
Coke	44
Coal tar and tar oils	50
Hydrogenation and hydrocarbon synthesis	51
Alcohol	51
Manufactured gaseous fuels	52
6. Industrial Boilers	58
Coal-fired boilers	59
Vertical boiler	60
Locomotive boiler	61
Lancashire boiler	62
Economic boiler	63
Thermal storage boiler	64
Water-tube boilers	65
Industrial hot water boilers	67
Boiler instruments	70
Carbon dioxide	73
Smoke as an index of efficiency	75
Alternatives to coal	78
Mechanical stokers	79
Pulverized fuel	82
Boiler availability	85
Soot blowing	86
Power and Electricity	87
Internal-combustion engine	90
Atmospheric pollution from engines	92
Cooling towers	93
Electricity	94
Tidal power	97
Uses of electricity	97
Conclusion	100
8. Industrial Furnaces	102
Group (1) furnaces	102
Horizontal retorts	103
Coke ovens	104
Vertical retorts	105
Static vertical retorts	106

	PAGE
Electric furnaces	106
Oil refineries	107
Group (2) furnaces	108
Atmospheric pollution from furnaces in Groups (1) and (2)	111
Group (3) furnaces	113
Steel industry	113
Clay industries	114
Lime and cement kilns	116
Atmospheric pollution from furnaces in Group (3)	118
Smoke in the steel industry	118
Tar burning	118
Clay industries, further remarks	119
Sulphur dioxide and grit	119
9. Domestic Heat Services	121
Choosing a domestic heating system	122
Closed stove	128
Central heating	128
Gas fires	130
Electric heaters	131
Thermal storage electric heating	131
Appliances combining several functions	132
Thermal insulation	133
Domestic heating and atmospheric pollution	133
Hot water and cooking	135
Coal economy	138
10. Atmospheric Pollution	141
Smoke	143
Ash	144
✓ Sulphur dioxide	146
Carbon monoxide; chlorine and fluorine compounds	147
Pollution from petroleum products	147
Ozone	148
Pollution from nuclear reactions	148
Radioactive pollution from bombs	150
Nuclear energy plants	151
Pollution from other sources	153
Gases from chemical works	153
Burning spoilbanks	154
Incineration of refuse	156

	PAGE
The offensive trades	156
Particles	157
Pollution experienced at ground level	158
11. Measurement of Atmospheric Pollution	162
Measurement of smoke	163
Smoke filter	166
Self-changing smoke filters	168
Portable smoke filters	168
Weighable smoke filter	170
Measurement of ash and other deposited pollution	170
Deposit gauge	171
Rapid surveys of deposited matter	175
Measurement of sulphur dioxide	178
Volumetric estimation of sulphur dioxide	178
Portable volumetric instruments for sulphur dioxide	180
Recording instruments for sulphur dioxide	180
Sulphur dioxide by the lead dioxide instrument	180
Surveys of sulphur dioxide	181
Microscopic examination of grit	182
Microscopic examination of suspended matter	184
Radioactive pollution	186
Measurement of daylight	187
Potassium iodide method	187
Photographic methods	187
Photoelectric methods	188
Use of measurements of atmospheric pollution	188
12. Distribution of Pollution	190
Distribution in Britain as a whole	190
Deposited matter	190
Smoke and sulphur dioxide	193
Distribution within a town	197
Deposited matter	197
Smoke and sulphur dioxide	197
Smoke from motor vehicles	203
Distribution in parks and smokeless zones	204
13. Changes in Pollution	207
Changes in deposited matter	209
Yearly cycle	211

	PAGE
Changes in suspended pollution (smoke and sulphur dioxide)	211
Irregular variation	215
Summary	220
Physics of fogs	220
Constituents of the London fog, December 1952	222
Quantities	224
Heat balance	225
Water balance	225
Smoke balance	226
Sulphur balance	226
Halogens	227
Oxides of carbon	227
14. Effects of pollution	228
Biological effects	228
Health	228
Smog disasters	229
Mortality attributed to smog	230
Precautions	234
Effects on animals	235
Effects on vegetation	235
Physico-chemical effects	236
Insulators	236
Metals	236
Materials	237
Fog, visibility and sunlight	238
The Cost of pollution	239
Conclusion	240
15. Prevention of Atmospheric Pollution	242
Preventing smoke	242
Preventing ash and grit	245
Selection of fuel	245
Design and operation of furnace	246
Grit arresters	247
Air conditioning	251
✓ Preventing sulphur dioxide	252
Removal of sulphur from fuel	253
Removing sulphur dioxide from flue gases	254
Chimney height	256

	PAGE
16. The Law and its Administration	260
Introduction	260
The Alkali Acts	263
The Clean Air Act	268
Dark smoke	269
Smoke from furnaces	270
Grit and dust from furnaces	271
Height of chimneys	271
Smoke control areas	272
Smokeless zones	273
Progress with smoke control areas	274
Smoke nuisances	275
Building bye-law	276
Air pollution from road vehicles	277
Legislation on air pollution throughout the world	278
United States of America	278
South Africa	285
Australia	286
Canada	287
West Germany	287
Belgium	288
Switzerland	289
Sweden	289
Norway	289
The Netherlands	289
France	289
Italy	290
The Council of Europe	291
Russia	291
Poland	291
Czechoslovakia	292
Japan	292
Hong Kong	292
Index	295
