	Page
1. Contamination control-an introduction	1
1.1 Introduction	1
1.2 Contamination control	2
1.3 History	3
1.4 Standardization	6
1.5 High levels of knowledge are of vital importance	9
1.6 Conclusions	17
2. Contaminants	19
2.1 Introduction	19
2.2 Cleanliness	19
2.3 Contaminants	20
2.4 Cleanliness requirements	26
2.5 Microorganisms	28
2.6 Control of microorganisms	37
2.7 Conclusions	38
3. Testing methods	41
3.1 Introduction	41
3.2 Analytical methods	41
3.3 The surrounding air	43
3.4 Cleanrooms	44
3.5 General particle analysis	47
3.6 Measurements according to US Federal Standard 209 E	47
3.7 Measurement of hygienic parameters in a cleanroom	51
3.8 Microbiological monitoring of air	52
3.9 Active sampling	54
3.10 Passive sampling	57
3.11 Sampling surfaces in cleanrooms and clean zones	58
3.12 Conclusions	60
4. Cleanrooms and clean zones	61
4.1 Introduction	61
4.2 Definition of a cleanroom	61
4.3 Classes of cleanroom	62
4.4 Occupancy states	64
4.5 The meaning of the cleanroom classification	64
4.6 US Federal Standard 209E	66
4.7 British Standard 5295	68
4.8 ISO >209<	70
4.9 Classification of airborne particles according to ISO 14644-1	73
4.10 Cleanliness testing within cleanrooms	74
4.11 Classification of pharmaceutical cleanrooms	76
4.12 Different types of cleanrooms	81
4.13 Cleanrooms and clean zones	85
4.14 Working in clean zones	85
4.15 Conclusions	95
5. Cleaning and decontamination	97
5.1 Introduction	97
5.2 The purpose of cleaning	97
5.3 Standards and practices	98

5.4	Cleaning	98
5.5	Cleaning responsibility	100
5.6	Classification of surface cleanliness	100
5.7	Basic cleaning	101
5.8	Cleaning program	102
5.9	Control of cleaning methods	103
5.10	Cleaning techniques	103
5.11	Cleaning methods	103
5.12	Cleaning solution	106
5.13	The Zinner circle	108
5.14	Elimination of microorganisms	109
5.15	Cleaning program	110
5.16	Risk factors associated with cleanroom decontamination	112
5.17	Conclusions	112
6.	Cleanroom garments	115
6.1	Introduction	115
6.2	Garment systems for cleanroom use	116
6.3	Choice of material	117
6.4	Aspects of comfort	118
6.5	Construction of garment system	119
6.6	Good Manufacturing Practice and Cleanroom Clothing	122
6.7	IEST-RP-CC-003.2	122
6.8	Using cleanroom garments	122
6.9	Clothing and personal items	123
6.10	Processing of clothing and change frequency	123
6.11	Risk factors associated with cleanroom clothing	124
6.12	Conclusions	124
7.	Personal hygiene and personal responsibility	125
7.1	Introduction	125
7.2	Man as generator of contaminants	125
7.3	Smoking	127
7.4	Good Manufacturing Practice for personnel	127
7.5	Education, training and control	128
7.6	Instructions	129
7.7	Man and the process	130
7.8	Guidelines for work within a cleanroom	131
7.9	Personal hygiene	132
7.10	Contamination risks associated with personnel	134
7.11	Conclusions	134
8.	Coccluding remarks	135
8.1	Cleanliness	135
8.2	Hygiene	135
8.3	Quality	136
8.4	General rules for working in cleanrooms	136
	Glossary	141
	Further reading	155
	Index	161
