

CONTENTS

	Page
Preface	vii
1. Toxicology of Environmental Pollutants	1
2. Pesticides in the Environment	10
3. Biological Indices of Environmental Changes in Aquatic Habitats	36
4. Factors Influencing Estuarine Microbiota	48
5. Effect of Pollution on Plants	82
6. Toxic Responses in Aquatic Organisms	101
7. Environmental Cancer Risks in an Industrialized Economy	118
8. Thermal Pollution and the Environment	150
9. Sources and Classification of Water Pollutants	197
10. Waste Treatment Methodology	220
11. Problems of Solid-Waste Pollution	244
12. Community Noise	286
13. Air Pollution from motor Vehicles	312
14. Technological Sources of Air Pollution	350
15. Meteorological Aspects of Air Pollution	409
16. Radiological Contamination of the Environment	456
17. Environmental Impact of Large Radiation	481
18. Atmospheric Chemistry as Applied to Environmental Pollution problems	504
19. Insurance and Pollution Damage	522
20. Cost of Air and Water Pollution	529
21. Factors Influencing the Development of Environmental Law	562
22. Encyclopedic Index	577
Index	685
