1 INTRODUCTION	1
1-1 Case studies, 3	
1-2 Units of measurement, 6	
1-3 Complexity, 9	
1-4 Future outlook, 10	
1-5 Problems, 10	
2 ECOSYSTEMS AND ENGINEERING	11
2-1 Properties of ecosystems, 12	
2-2 Hydrologic cycle, 19	
2-3 Energy, 21	
2-4 Biogeochemical cycles, 22	
2-5 Problems, 27	
References, 28	

3 MATERIALS AND ENERGY BALANCES

29

- 3-1 Background, 29
- 3-2 Flowing streams of material, 30
- 3-3 The materials balance equation, 32
- 3-4 Choosing the basis and the boundaries, 33
- 3-5 Analysis of steady-state flow processes, 35
- 3-6 Transient processes, 46
- 3-7 Various forms of energy and power, 48
- 3-8 Flowing streams of energy, 51
- 3-9 Real-world energy conversion processes, 53
- 3-10 Combined energy and material balances, 54
- 3-11 Problems, 59
- References. 67

4 CHEMICAL SYSTEMS

69

- 4-1 Introduction, 69
- 4-2 The gas laws, 70
- 4-3 Stoichiometry, 75
- 4-4 Chemical reaction rates, 86
- 4-5 Acids and bases, 97
- 4-6 Problems, 110
- References. 112

5 BIOLOGICAL PROCESSES

113

- 5-1 Introduction, 113
- 5-2 Classification of organisms, 114
- 5-3 Nutrients, 114
- 5-4 Bacterial growth, 116
- 5-5 Decomposition of wastes, 122
- 5-6 Photosynthesis and respiration, 127
- 5-7 Oxygen balance in aquatic ecosystems, 129
- 5-8 Oxygen sag curve, 134
- 5-9 Stream pollution, 136
- 5-10 Bacteriological examination of water, 138
- 5-11 Conclusion, 139
- 5-12 Problems, 140
- References. 142

6 WATER MANAGEMENT **143**

- 6-1 Hydrologic data, 143
- 6-2 Sources of freshwater supply, 144
- 6-3 Precipitation and rainfall excess, 145
- 6-4 Infiltration, 146
- 6-5 Reservoirs, 147
- 6-6 Water storage and treatment, 151
- 6-7 Problems, 154
- References, 156

7 WATER TREATMENT **157**

- 7-1 Introduction, 157
- 7-2 Public health, 158
- 7-3 Standards, 161
- 7-4 Potable water sources, 166
- 7-5 Treatment processes, 168
- 7-6 Corrosion, 187
- 7-7 Removal of organics and trace metals, 189
- 7-8 Water transmission and distribution, 190
- 7-9 Conclusion, 198
- 7-10 Problems, 199
- References, 201

8 WASTEWATER TREATMENT **203**

- 8-1 Introduction, 203
- 8-2 Treatment processes, 204
- 8-3 Sedimentation, 206
- 8-4 Activated sludge process, 212
- 8-5 Activated sludge process modifications, 220
- 8-6 Anaerobic treatment, 225
- 8-7 Sludge digestion, 226
- 8-8 Advanced wastewater treatment, 228
- 8-9 On-site wastewater treatment, 230
- 8-10 Problems, 232
- References, 233

9 ENERGY SUPPLIES AND POWER GENERATION 235

- 9-1 Introduction, 235
- 9-2 The U.S. energy picture, 236
- 9-3 Fossil fuels in the world and the United States, 240
- 9-4 Electrical power generation, 244
- 9-5 Some thermodynamic considerations, 251
- 9-6 Alternative sources of energy, 257
- 9-7 Synthetic fuels, 263
- 9-8 Pollution problems associated with energy processing, 265
- 9-9 Future outlook, 266
- 9-10 Problems, 267
- References. 269

10 AIR POLLUTION 271

- 10-1 The major air pollutants, 272
- 10-2 Atmospheric dispersion, 273
- 10-3 Legislative standards and controls, 284
- 10-4 Pollution control technology, 288
- 10-5 Problems, 299
- References. 301

11 SOLID WASTES AND RESIDUES 303

- 11-1 Types, quantities and characteristics, 303
- 11-2 Municipal solid wastes—Generation and collection, 305
- 11-3 Sanitary landfill, 307
- 11-4 Alternatives to landfilling, 310
- 11-5 Economic analysis of MSW incineration and resource recovery, 314
- 11-6 Conclusion, 318
- 11-7 Problems, 318
- References. 319

12 HAZARDOUS WASTES 321

- 12-1 Introduction, 321
- 12-2 Kinds of hazardous waste, 324
- 12-3 Sites and sources. 325

12-4 Treatment and disposal of hazardous wastes, 326
12-5 Radioactive wastes, 339
12-6 Problems, 341
References, 342

13 ENVIRONMENTAL IMPACT ASSESSMENT	345
---	------------

13-1 Introduction, 345
13-2 Background, 346
13-3 How the impact assessment system works, 347
13-4 Methodologies, 351
13-5 Noise, 354
13-6 Cultural-historical impacts, 359
13-7 Socioeconomic impacts, 361
13-8 Externalities and environment, 362
13-9 Problems, 364
References, 365

APPENDIX A	367
NOTATION	

APPENDIX B	371
METRIC UNITS WITH CUSTOMARY EQUIVALENTS AND PHYSICAL CONSTANTS	

APPENDIX C	377
CHEMICAL DATA	

APPENDIX D	383
FLUID CHARACTERISTICS	

APPENDIX E	387
ANSWERS TO ODD-NUMBERED PROBLEMS	

INDEX	301
