PART I	
ONE – DIMENSIONAL MOTION OF A COMPRESSIBLE FLUID	
1. Basic Thermodynamics	3
2. Equations of Motion in one Dimension	13
3. Isentropic Channel Flow	23
4. Shock Waves	38
5. Applications to Channel Flow	66
6. Optical Methods of Flow Observation	89
PART II	
TWO – AND THREE- DIMENSIONAL MOTIONS OF A COMPRESSIBLE FLUID	
7. The equations of Motion	104
8. The Small-Perturbation Method	121
9. Some Applications of the Small-Perturbation Method	142
10. The Development of Φ into Power Series in the Thickness Parameter or in the Mach Number	157
11. The Hodograph methods	163
12. Certain Exact Solutions for the Isentropic Flow of a Perfect Gas	189
13. The Method of Characteristics	210
14. The Effects of Viscosity	233
15. Airfoils in High Speed Flow. Comparison with Experiment	242
