	Page
Trends in the Automotive Industry and their Effect on Materials Requirements	1
Technical Information on Tyre Sidewalls	7
Current Progress of Synthetic Rubbers for Automotive Applications	16
Novel Applications of Co-ordination Complexes : Anti-corrosives	38
Novel Applications of Co-ordination Complexes : Adhesive Promoters	47
Environmentally Acceptable Coatings for the Automotive Industry	55
Automotive Anti-corrosion Pretreatment : Trends and Controls of Pretreatment Systems for the Automotive Industry	71
Corrosion Protection of Vehicles	80
Towards Longevity of Crankcase Lubricants : Current Situation	87
Toward Longevity of Crankcase Lubricants : Lubricant Additives, Future Trends	104
Gasoline Volatility	114
The Role of Ethers in the Formulation of Clean Petrol	123
Replacement of Diesel by Alcohol	134
Aqueous and Non-aqueous Engine Coolants based on Propylene Glycol	145
Synthetic Resins for Glass-Fibre Reinforced Plastics	153
Foam Sandwich Processing for Automotive Applications	161
Environmentally Considerate Lubricants for the Automotive and Engineering Industries	165
New Automotive Technology with Polyurethane for Interior Trim : Integrated Seating or Door Panels	179
Chemical Analysis Using FTIR Spectroscopy in the Automotive Industry	185
Subject Index	198
