<i>Organizing Committee</i>	ix
<i>Preface</i>	xi
<i>Acknowledgements</i>	xiii

## **Soil and Crop Management for Efficient Use of Water and Nutrients**

Contributions of Chemistry to Removing Soil Constraints to Crop Production R.S. RUSSELL and G.W. COOKE	1
Developing More Efficient Fertilizers Through Formulation, Manufacturing, and Distribution Technology D.L. McCUNE	22
Modifying Crop Performance with Plant Growth-Regulating Chemicals J. BRUINSMA	35
Improving the Productivity of Problem Rice Lands F.N. PONNAMPERUMA	47
Chemical Approaches Towards Increasing Water Availability to Crops Including Minimum Tillage Systems R. LAL, A.S.R. JUO and B.T. KANG	57
New Developments in Chemical Control of Weeds J.R. CORBETT	79
Chemical Techniques for Monitoring Analysis, and Avoiding Pollution of Soil and Water Resources N.J. DRESCHER	89
Integrated Approaches to Pest Management – Principal Pests of Food J.C. DAVIES	97

## **Integrated Approaches to Pest Management**

Principal Diseases of Food Crops G. RANGASWAMI	109
Interaction Among Pests, Diseases and Weeds in Farming Systems J.R. FINNEY	121
The Biochemical Basis of Resistance in Host Plants to Insect Pests M.D. PATHAK and D. DALE	129
Naturally Occurring Pesticides and Their Potential R.C. SAXENA	143
Pheromones and Other Recent Developments in Biochemical Pest Management P.S. BEEVOR, D.R. HALL and B.F. NESBITT	163
The Potential for the Integration of Plant Resistance, Agronomic, Biological, Physical/Mechanical Techniques, and Pesticides for Pest Control in Farming Systems I.N. OKA	173
Environmental Aspects of Pest Management D. PIMENTEL	185

## **The Role of Chemistry and Biochemistry in Improving Animal Production Systems**

Nitrogen Sources and Roughage in Ruminant Nutrition J.H.B. ROY	203
The Use of Sugar Cane and By-Products for Livestock T.R. PRESTON	221
Advances in Fodder Conservation E. ZIMMER	237
Recent Development in Feed Additives Z.O. MULLER	249
Biochemical and Chemical Contributions to Efficient Small Scale Pig and Poultry Systems A. AUMAITRE	269
The Role of Chemistry in Aquaculture Systems: Problems in Breeding and Feeding Fishes R.D. GUERRERO III	283
Chemistry in the Control of Ruminant Animal Diseases and Reduction of Physical and Biological Stress R.H. DUNLOP	291
Chemistry and the Control of Animal Trypanosomiasis and Theileriosis A.R. GRAY	309

## **Contributions of Chemistry and Biochemistry to Developing New and Improved Food Sources**

Synthetic Foods: Technical, Cultural and Legal Issues S.A. MILLER	319
New Protein Sources of Food and Feed Y. MINODA	329
Conversion of Plant and Animal Waste to Food A. RUTKOWSKI	337
Improving the Supply, Quality and Utility of Carbohydrates R. RAJALAKSHMI	349
Improving the Supply, Quality and Utility of Fats J. MOOLAYIL	359
Rumen-Protected Amino Acids H. OFFERMANN and H. TANNER	373
Improving the Supply, Quality, and Utility of Proteins S. ARAI	383
Expanding and Improving the Food Supply with Enzyme Systems B. WOLNAK	393

## **Chemistry and Biochemistry in the Processing and Storage of Food**

Review of Storage and Processing J. SOLMS and M. BACHMANN	399
Fish Processing T. BØRRESEN and T. STRØM	411
Progress in Preservation of Food Through Fermentation K.H. STEINKRAUS	421

Amino Acid Production and Use to Improve Nutrition of Foods and Feeds T. AKASHI	437
Studies on Heat Treatment of Wheat Grains in China R. LIU, Y. XIONG , and C. WANG	443
Removal by Processing of Naturally Occurring Toxicants and Antinutrients I.E. LIENER	453
Water Activity and Intermediate Moisture Foods M. KAREL	465

### **Chemistry in the Assessment and Control of the Food Supply**

New Developments of Cooperation Among the Chemical Industries to Improve Control of the Food Supply P. ROESSLER	477
Overview of Assessment and Control R.A. EDWARDS	483
Effects on Nutritional Quality of Food Legumes from Chemical Changes Through Processing and Storage R. BRESSANI, J.E. BRAHAM, and L.G. ELIAS	491
The Rapid Screening of Food for Contaminants and Toxicants H.B.S. CONACHER	505
Rapid, Simple Testing for Nutrients as an Aid to Plant Breeding B.O. JULIANO	515
Multivariate Analysis of Raw Materials K.H. NORRIS	527
The Important Difference Between Chemical Analysis and Biological Availability A.E. BENDER	537
Problems of Correlation and Definition of Analytical Techniques W. BALTES	547

### **The Forward Edge**

Overview of the Potential and Prospects in Genetic Engineering of Plants L. BOGORAD	553
Applications of Genetic Engineering to Plant and Animal Production J. SCHRODER and J. SCHELL	563
The Application of Wide Crosses to Plants L.H. SHEBESKI	569
Improved Conventional Strategies and Methods for Selection and Utilization of Germplasm D.N. DUVICK	577
Chemical, Biological, Genetic, Biological and Agronomic Approaches to Improved or Alternate Technologies to Provide Fixed Nitrogen R.W.F. HARDY	585
The Role of Growth Regulators and Hormones in Enhancing Food Production L.G. NICKELL	601
The Potential Contribution of Cell and Plant Tissue Culture to Crop Improvement O.J. CROCOMO and N. OCHOA-ALEJO	607

Photosynthetic Activity and Partitioning L.T. EVANS	621
New Approaches to Meat and Milk Production V.W. HAYS	633
Biorational Design of Chemicals H. GEISSBUHLER, U. MULLER, J.P. PACHLATKO and H-R. WAESPE	643
Author Index	657
Subject Index	659
