Foreword

Egyptian rice research and training center inaugural

Welcome **1**

A. Momtaz

Dedication **3**

Y. A. Wally

A vision of Egyptian agriculture **9**

F. G. Wisner

No time to relax **11**

M. S. Swaminathan

Rice in Egyptian and global agriculture in 2000

Progress in agricultural research **25**

N. C. Brady

The role of early-maturing rice varieties in the cropping systems of Egypt **35**

M. M. El-Gabaly

Rice in Egyptian and global agriculture **41**

R. W. Herdt

Research and management strategies for increased rice production in Egypt **55**

A. Momtaz

New dimensions for genetic improvement in rice

Innovative approaches to rice improvement **71**

G. S. Khush

New possibilities for rice breeding **85**

K. Toriyama

Rice varietal improvement in Egypt **91**

M. S. Balal

Commercial exploitation of hybrid vigor in rice **103**

Yuan Longping

Varietal performance in international irrigated rice trials **113**

D. V. Seshu

Strategies in rice crop management

Fertilizer use efficiency in rice 129

M. R. Hamissa and F. N. Mahrous

Integrated nutrient management in relation to soil fertility in lowland rice-based cropping systems 141

S. K. De Datta

Integrated weed control in rice 161

T. S. I. Ibrahim

Mechanization of rice production in Egypt 167

A. F. El-Sahrigi and S. Ishihara

Rice blast disease management 175

M. A. Marchetti and J. M. Bonman

Management of rice blast disease in Egypt 185

S. E. M. Kamel and T. A. El-Sharkawy

Integrated management of rice insect pests 203

B. M. Shepard

Integrated pest management in Egypt 213

A. L. Tea

New directions for rice farming systems

Rice-based cropping systems management in Egyptian Vertisols: the ICRISAT experience 219

J. S. Kanwar

Agroeconomic opportunities in rice-based farming systems research 239

J. C. Flinn and G. L. Denning

Wheat: a complementary crop for traditional rice-growing countries of Asia 255

G. Ortiz Ferrara, B. C. Curtis, D. A. Saunders, and P. R. Hobbs

Rice-based crop - livestock systems in Egypt 265

T. L. Nordblom

Relevance of ICARDA Nile Valley Project on faba beans for rice-based cropping systems of Egypt 269

M. C. Saxena and A. M. Nassib

Extending rice cultivation to new areas in Egypt 275

A. Momtaz and E. A. Siddiq

Biotechnology and rice improvement

Efficient regeneration of plants from rice protoplasts 291

E. C. Cocking

Plant genetic engineering and valuable gene traits 297

J. D. Kemp

Biofertilization using blue-green algae in rice 305

M. N. Alaa El-Din and S. N. Shalan

Utilization of biotechnology in the production of cereals 319

I. Munck

Postharvest technology and by-product utilization for rice

Rice processing and handling technologies 329

M. R. El-Amir

Basic rice seed production in Egypt 333

J. M. Swagerty

Certified rice seed production in Egypt 337

A. F. El-Azizi and A. A. Gomaa

Recent accomplishments in rice research in Egypt

Heterosis in rice *Oryza sativa* L. 343

Genetic behavior of induced earliness in rice 343

Performance of some rice mutants 344

Partial resistance to blast disease in some rice varieties 344

Inheritance of resistance to rice stem borer *Chilo agamemnon* Bles. 345

Relationship between leaf and neck infections of rice blast disease

Pyricularia oryzae 346

Effect of spore density and environment on rice blast epidemic 346

Modeling parasite:host environment specificity 347

Brown spot disease of rice in Egypt 347

Estimated yield losses due to rice root nematode and management strategies 348

Effect of planting method on level of rice stem borer *Chilo agamemnon* Bles infestation 349

Testing pesticides for genetic hazards to rice 349

Yield and productivity of local and IRRI rice varieties in different districts of Beheira Governorate 350

Effect of date of sowing and management on seedling characters 350

Effect of algalization by increased inoculum rates of soil-based blue-green algae on growth and yield of transplanted rice 351

Method of application and rate of urea hydrolysis and movement 351

Effect of nitrogen sources and method application on ammonia volatilization in flooded soils 352

Using tracer technique to measure effect of rate, timing, and method of application on fertilizer nitrogen use by rice 353

Denitrification in rice 354

Effect of fertilizer elements on rice yield 354

Relative efficiency of nitrogen and phosphorus fertilizers for rice in Egypt 355

Response of some rice cultivars to different rates and split applications of nitrogen 355

Integrated weed control in broadcast seeded rice 356

Effect of oxadiazon, pretilachlor, and their combinations on control of rice weeds 357

Compatibility of fenoxaprop with selected herbicides for control of rice weeds, with special reference to barnyard grass 357

Tile drainage design for areas with rice in the crop rotation	358
Effect of sowing date and method of raising seedlings on rice yield and its components	359
Yield response of some rice varieties to different planting times	360
Effect of some agronomic practices on yield and its components	360
Effect of time of transplanting on growth and yield of rice	361
Improved nursery beds for mechanical transplanting of rice in Egypt	361
Effective field efficiency of some types of rice transplanters	362
Economic analysis of rice planting methods	362
Effect of milling methods on grain quality	363
Edible oyster mushroom cultivation on rice straw	363
Symposium recommendations for rice research in Egypt	365
Participants	373
