| FOREWORD  | vii  |
| PREFACE   | ix   |
| CONTRIBUTORS  | xv   |
| <br>  |      |
| <b>1</b>  |      |
| <b>Errors of Observation</b>  |      |
| <b>OSCAR KEMPTHORNE AND R. R. ALLMARAS</b>                                |      |
| 1-1 Introduction  | 1    |
| 1-2 Classification of Errors of Measurement                               | 2    |
| 1-3 Scientific Validity of Measurements                                   | 4    |
| 1-4 Characterization of Variability                                       | 5    |
| 1-5 The Estimation of Precision   | 12   |
| 1-6 Precision of Derived Observations                                     | 15   |
| 1-7 The Roles of Bias and Precision                                       | 19   |
| 1-8 A Note on Terminology   | 21   |
| 1-9 Statistical Problems and Techniques in General                        | 22   |
| 1-10 Literature Cited   | 23   |
| <br>  |      |
| <b>2</b>  |      |
| <b>Bias</b>   |      |
| <b>R. R. ALLMARAS</b>   |      |
| 2-1 General Introduction  | 24   |
| 2-2 Mathematical Forms of Bias and Their Consequences                     | 25   |
| 2-3 Experimental Investigation of Bias                                    | 26   |
| 2-4 Practical Significance of Bias  | 39   |
| 2-5 Operational Control of Bias in Comparative Analyses                   | 40   |
| 2-6 Literature Cited  | 42   |
| <br>  |      |
| <b>3</b>  |      |
| <b>Extraneous Values</b>  |      |
| <b>W. J. DIXON</b>  |      |
| 3-1 Introduction  | 43   |
| 3-2 The Problem of Estimation (Use of the Median and Range)               | 44   |
| 3-3 Confidence Limits as Estimates  | 46   |
| 3-4 The Problem of Designating Extraneous Values                          | 47   |
| 3-5 Recommended Rules for Designating Extraneous Values                   | 48   |
| 3-6 Recommended Rules for Estimation in the Presence of Extraneous Values | 48   |
| 3-7 Literature Cited  | 49   |

**4 Operator Variation**

C. A. BLACK

|                      |    |
|----------------------|----|
| 4-1 Introduction     | 50 |
| 4-2 Example          | 50 |
| 4-3 Causes           | 51 |
| 4-4 Remedies         | 52 |
| 4-5 Literature Cited | 53 |

**5 Sampling**

R. G. PETERSEN AND L. D. CALVIN

|                        |    |
|------------------------|----|
| 5-1 Introduction       |    |
| 5-2 Variation of Soils |    |
| 5-3 Sampling Plans     | 56 |
| 5-4 Sources of Errors  | 66 |
| 5-5 Subsampling        | 66 |
| 5-6 Composite Samples  | 70 |
| 5-7 Literature Cited   | 77 |

**Calibration**

H. T. DAVID AND F. B. CADY

|  |    |
|--|----|
| 6-1 The Nature of Calibration          | 73 |
| 6-2 Statistical Aspects of Calibration | 74 |
| 6-3 Examples                           | 76 |
| 6-4 Literature Cited                   | 81 |

**Water Content**

WALTER H. GARDNER

|                          |     |
|--------------------------|-----|
| 7-1 General Introduction | 82  |
| 7-2 Direct Methods       | 84  |
| 7-3 Indirect Methods     | 98  |
| 7-4 Literature Cited     | 125 |

**8 Physical Condition of Water in Soil**

A. RICHARDS

|   |     |
|---|-----|
| 8-1 General Introduction  | 128 |
| 8-2 Water Retentivity of Soil at Specified Values of Matric Suction | 131 |
| 8-3 Freezing Point of Water in Soil                                 | 137 |
| 8-4 Vapor Pressure of Water in Soil                                 | 140 |
| 8-5 Literature Cited  | 151 |

**9 Soil Suction Measurements With Tensiometer**

S. J. RICHARDS

|                      |     |
|----------------------|-----|
| 9-1 Introduction     | 153 |
| 9-2 Principles       | 154 |
| 9-3 Method           | 156 |
| 9-4 Applications     | 160 |
| 9-5 Literature Cited | 163 |

## 10 Heat of Immersion

D. M. ANDERSON

|      |                  |     |
|------|------------------|-----|
| 10-1 | Introduction     | 164 |
| 10-2 | Principles       | 166 |
| 10-3 | Method           | 172 |
| 10-4 | Literature Cited | 179 |

## 11 Hydraulic Head

R. C. REEVE

|      |   |     |
|------|---|-----|
| 11-1 | Introduction                                    | 180 |
| 11-2 | Principles                                      | 181 |
| 11-3 | Method of Installing Piezometers by Driving     | 185 |
| 11-4 | Method of Installing Piezometers by Jetting     | 187 |
| 11-5 | Method of Flushing and Testing Piezometers      | 189 |
| 11-6 | Method of Measuring Water Levels in Piezometers | 190 |
| 11-7 | Method of Installing Tensiometers               | 192 |
| 11-8 | Interpretation of Hydraulic-Head Readings       | 193 |
| 11-9 | Literature Cited                                | 196 |

## 12 Rate of Water Intake in the Field

ANSON R. BERTRAND

|      |                                   |     |
|------|-----------------------------------|-----|
| 12-1 | General Introduction              | 197 |
| 12-2 | Method of Artificial Rainfall     | 198 |
| 12-3 | Method of Flooding                | 202 |
| 12-4 | Method of Watershed Hydrographs   | 207 |
| 12-5 | Analysis and Presentation of Data | 208 |
| 12-6 | Literature Cited                  | 208 |

## 13 Laboratory Measurement of Hydraulic Conductivity of Saturated Soil

A. KLUTE

|      |                  |     |
|------|------------------|-----|
| 13-1 | Introduction     | 210 |
| 13-2 | Principles       | 210 |
| 13-3 | Methods          | 213 |
| 13-4 | Literature Cited | 220 |

## 14 Field Measurement of Hydraulic Conductivity Below a Water Table

L. BOERSMA

|      |                   |     |
|------|-------------------|-----|
| 14-1 | Introduction      | 222 |
| 14-2 | Auger-Hole Method | 223 |
| 14-3 | Piezometer Method | 229 |
| 14-4 | Literature Cited  | 233 |

## 15 Field Measurement of Hydraulic Conductivity Above a Water Table

L. BOERSMA

|      |                             |     |
|------|-----------------------------|-----|
| 15-1 | Introduction                | 234 |
| 15-2 | Double-tube Method          | 234 |
| 15-3 | Shallow-Well Pump-In Method | 242 |
| 15-4 | Permeameter Method          | 248 |
| 15-5 | Literature Cited            | 252 |

|           |   |                           |
|-----------|---|---------------------------|
| <b>16</b> | <b>Laboratory Measurement of Hydraulic Conductivity of Unsaturated Soil</b> |                           |
|           |   | <b>A. KLUTE</b>           |
| 16-1      | Introduction . . . . .  | 253                       |
| 16-2      | Principles . . . . .  | 253                       |
| 16-3      | Method . . . . .  | 255                       |
| 16-4      | Literature Cited . . . . .  | 261                       |
| <b>17</b> | <b>Water Diffusivity</b>  |                           |
|           |   | <b>A. KLUTE</b>           |
| 17-1      | Introduction . . . . .  | 262                       |
| 17-2      | Principles . . . . .  | 262                       |
| 17-3      | Method . . . . .  | 264                       |
| 17-4      | Literature Cited . . . . .  | 272                       |
|           | <b>Water Capacity</b>   |                           |
|           |   | <b>A. KLUTE</b>           |
| 18-1      | Introduction . . . . .  | 273                       |
| 18-2      | Method . . . . .  | 274                       |
| 18-3      | Literature Cited . . . . .  | 278                       |
| <b>19</b> | <b>Water Availability</b>   |                           |
|           |   | <b>D. B. PETERS</b>       |
| 19-1      | General Introduction . . . . .  | 279                       |
| 19-2      | Field Capacity . . . . .  | 279                       |

**42 Specific Surface**

M. M. MORTLAND AND W. D. KEMPER

- 42-1 Introduction . . . . .
- 42-2 Principles . . . . .
- 42-3 Method . . . . .
- 42-4 Literature Cited . . . . .

**43 Particle Fractionation and Particle-Size Analysis**

PAUL R. DAY

- 43-1 Introduction . . . . .
- 43-2 Principles . . . . .
- 43-3 Method for Separation of Clay, Silt, and Sand Fractions . . . . .
- 43-4 Pipette Method of Particle-Size Analysis . . . . .
- 43-5 Hydrometer Method of Particle-Size Analysis . . . . .
- 43-6 Literature Cited . . . . .

**44 Pretreatment for Mineralogical Analysis**

G. W. KUNZE

- 44-1 General Introduction . . . . .
- 44-2 Removal of Soluble Salts and Carbonates . . . . .
- 44-3 Removal of Organic Matter . . . . .
- 44-4 Removal of Free Iron Oxides . . . . .
- 44-5 Particle-Size Separations . . . . .
- 44-6 Literature Cited . . . . .

**45 Free Oxides, Hydroxides, and Amorphous Aluminosilicates**

M. L. JACKSON

- 45-1 General Introduction . . . . . 578
- 45-2 Quartz . . . . . 580
- 45-3 Amorphous Aluminosilicates, Silica, and Alumina . . . . . 587
- 45-4 Allophane . . . . . 592
- 45-5 Rutile and Anatase . . . . . 598
- 45-6 Literature Cited . . . . . 601

**46 Petrographic Microscope Techniques**

JOHN G. CADY

- 46-1 General Introduction . . . . . 604
- 46-2 Grains . . . . . 605
- 46-3 Thin Sections . . . . . 617
- 46-4 Applications . . . . . 628
- 46-5 Literature Cited . . . . . 630

**47 Electron Microscope Techniques**

J. A. KITTRICK

- 47-1 Introduction . . . . . 632
- 47-2 Principles and Instrumentation . . . . .
- 47-3 Specimen Preparation . . . . . 637
- 47-4 Enhancing Specimen Definition . . . . . 647
- 47-5 Sources of Information . . . . . 649
- 47-6 Literature Cited . . . . . 651

48 **Electron-Diffraction Techniques for Mineral Identification**

J. A. KITTRICK

|      |                        |     |
