<b>52 Elemental Analysis by X-Ray Emission Spectrography</b>	
	<b>R. C. VANDEN HEUVEL</b>
52-1 Introduction . . . . .	771
52-2 Principles . . . . .	772
52-3 Method . . . . .	805
52-4 Literature Cited . . . . .	819
<b>53 Elemental Analysis by Optical Emission Spectrography</b>	
	<b>ALSTON W. SPECHT, ALFRED T. MYERS, AND UTEANA ODA</b>
53-1 Introduction . . . . .	822
53-2 Principles . . . . .	822
53-3 Instrumentation . . . . .	825
53-4 Method for Elemental Analysis of Soil Extracts . . . . .	827
53-5 Method for Total Analysis . . . . .	837
53-6 Semiquantitative Method for Total Analysis . . . . .	846
53-7 Literature Cited . . . . .	847
<b>54 Elemental Analysis by Flame Photometry</b>	
	<b>C. I. RICH</b>
54-1 Introduction . . . . .	849
54-2 Principles . . . . .	849
54-3 Instrumentation . . . . .	853
54-4 Preparation of Solution . . . . .	856
54-5 Methods for Overcoming Spectral Interferences . . . . .	858
54-6 Wavelength, Flame Conditions, and Interferences for Individual Elements	860
54-7 Standard Solutions . . . . .	861
54-8 Readings for Routine Analysis . . . . .	861
54-9 General Methods for Specific Extracts . . . . .	862
54-10 Precision and Accuracy in Flame Photometry . . . . .	864
54-11 Literature Cited . . . . .	864

**55 Absorption Spectrophotometry****ALLAN B. PRINCE**

55-1	Introduction	866
55-2	Principles	867
55-3	Filter Photometry	870
55-4	Spectrophotometry	875
55-5	Calibration	877
55-6	Literature Cited	878

**56 Elemental Analysis by Polarography****RONALD G. MENZEL**

56-1	General Introduction	879
56-2	Principles	880
56-3	Instrumentation	883
56-4	Sample Preparation	884
56-5	Calibration	885
56-6	Simultaneous Determination of Copper, Nickel, Zinc, Cobalt, and Manganese	885
56-7	Dissolved Oxygen in Soil Solution	888
56-8	Literature Cited	890

**57 Cation-Exchange Capacity****H. D. CHAPMAN**

57-1	Introduction	891
57-2	Cation-Exchange Capacity by Ammonium Saturation	894
57-3	Cation-Exchange Capacity by Sodium Saturation	899
57-4	Cation-Exchange Capacity by Summation	900
57-5	Literature Cited	900

**58 Total Exchangeable Bases****H. D. CHAPMAN**

58-1	Introduction	902
58-2	Method	903
58-3	Literature Cited	904

**59 Exchange Acidity****MICHAEL PEECH**

59-1	Introduction	905
59-2	Residual-Carbonate Method	907
59-3	Barium Chloride-Triethanolamine Method	910
59-4	Ammonium Acetate Method	912
59-5	Literature Cited	912

**60 Hydrogen-Ion Activity****MICHAEL PEECH**

60-1	Introduction	914
60-2	Factors Affecting Soil pH	917
60-3	Soil pH by Glass Electrode pH Meter	920
60-4	Soil pH by Indicators	924
60-5	Literature Cited	925

**CONTENTS. PART 2****61 Lime Requirement****MICHAEL PRECH**

61-1 Introduction . . . . .	927
61-2 Barium Chloride-Triethanolamine Method . . . . .	928
61-3 Soil pH Method . . . . .	929
61-4 Literature Cited . . . . .	932

**62 Soluble Salts****C. A. BOWER AND L. V. WILCOX**

62-1 Saturation Extract and Other Aqueous Extracts . . . . .	933
62-2 Soluble Salts by Electrical Conductivity . . . . .	936
62-3 Soluble Constituents in Aqueous Extracts . . . . .	940
62-4 Literature Cited . . . . .	951

**63 Fusion With Sodium Carbonate for Total Elemental Analysis****YOSHINORI KANEHIRO AND G. DONALD SHERMAN**

63-1 Introduction . . . . .	952
63-2 Principles . . . . .	952
63-3 Method for Preparation of Sample . . . . .	953
63-4 Method for Loss on Ignition . . . . .	954
63-5 Method for Pretreatment of Soils High in Iron Oxide and Manganese Oxide . . . . .	955
63-6 Method for Fusion With Sodium Carbonate . . . . .	955
63-7 Method for Preparation of Fusion for Analysis . . . . .	957
63-8 Literature Cited . . . . .	958

**64 Silicon****VICTOR J. KILMER**

64-1 Introduction . . . . .	959
64-2 Principles . . . . .	959
64-3 Method . . . . .	960
64-4 Literature Cited . . . . .	962

**65 Iron****R. V. OLSON**

65-1 Total Iron . . . . .	963
65-2 Exchangeable Iron . . . . .	967
65-3 Availability Indexes . . . . .	969
65-4 Free Iron Oxides . . . . .	971
65-5 Literature Cited . . . . .	973

**66 Titanium****G. DONALD SHERMAN AND YOSHINORI KANEHIRO**

66-1 Introduction . . . . .	974
66-2 Principles . . . . .	974
66-3 Acid Digestion Method . . . . .	975
66-4 Fusion Method . . . . .	976
66-5 Literature Cited . . . . .	977

**67 Aluminum****E. O. McLEAN**

67-1	General Introduction	978
67-2	Total Aluminum	980
67-3	Exchangeable Aluminum	985
67-4	Extractable Aluminum	994
67-5	Literature Cited	997

**68 Calcium and Magnesium****WALTER R. HEALD**

68-1	Introduction	999
68-2	Principles	999
68-3	Method	1003
68-4	Availability Indexes	1008
68-5	Literature Cited	1009

**69 Manganese****FRED ADAMS**

69-1	Introduction	1011
69-2	Total Manganese	1011
69-3	Method for Exchangeable Manganese	1013
69-4	Availability Indexes	1014
69-5	General Comments	1016
69-6	Literature Cited	1017

**70 Digestion With Hydrofluoric and Perchloric Acids for Total Potassium and Sodium****P. F. PRATT**

70-1	Introduction	1019
70-2	Method	1020
70-3	Literature Cited	1021

**71 Potassium****P. F. PRATT**

71-1	General Introduction	1022
71-2	Total Potassium	1022
71-3	Exchangeable Potassium	1025
71-4	Availability Indexes	1027
71-5	Literature Cited	1030

**72 Sodium****P. F. PRATT**

72-1	General Introduction	1031
72-2	Total Sodium	1031
72-3	Exchangeable Sodium	1033
72-4	Availability Indexes	1034
72-5	Literature Cited	1034

73	<b>Phosphorus</b>	<b>S. R. OLSEN AND L. A. DEAN</b>
73-1	Introduction . . . . .	1035
73-2	Total Phosphorus . . . . .	1036
73-3	Organic Phosphorus . . . . .	1038
73-4	Availability Indexes . . . . .	1040
73-5	Literature Cited . . . . .	1048
74	<b>Molybdenum</b>	<b>H. M. REISENAUER</b>
74-1	Total Molybdenum . . . . .	1050
74-2	Molybdenum Availability Indexes . . . . .	1054
74-3	Literature Cited . . . . .	1057
75	<b>Boron</b>	<b>JOHN I. WEAR</b>
75-1	Introduction . . . . .	1059
75-2	Principles . . . . .	1059
75-3	Method for Total Boron . . . . .	1060
75-4	Method for Hot-Water-Soluble Boron . . . . .	1062
75-5	Comments . . . . .	1063
75-6	Literature Cited . . . . .	1063
76	<b>Cobalt</b>	
	<b>KENNETH C. BEESON, JOE KUBOTA, AND V. A. LAZAR</b>	
76-1	Introduction . . . . .	1064
76-2	Colorimetric Analysis Using Ortho-Nitrosocresol . . . . .	1065
76-3	Colorimetric Analysis Using Nitroso-R-Salt . . . . .	1074
76-4	Availability Index . . . . .	1075
76-5	Literature Cited . . . . .	1076
77	<b>Copper</b>	<b>JOHN G. A. FISKELL</b>
77-1	Total Copper . . . . .	1078
77-2	Availability Indexes . . . . .	1084
77-3	Literature Cited . . . . .	1089
78	<b>Zinc</b>	<b>FRANK G. VIETS, JR., AND LOUIS C. BOAWN</b>
78-1	Introduction . . . . .	1090
78-2	Total Zinc . . . . .	1091
78-3	Availability Indexes . . . . .	1096
78-4	Literature Cited . . . . .	1100
79	<b>Sulfur</b>	<b>C. E. BARDSLEY AND J. D. LANCASTER</b>
79-1	General Introduction . . . . .	1102
79-2	Total Sulfur . . . . .	1103
79-3	Organic Sulfur . . . . .	1108
79-4	Availability Indexes . . . . .	1110
79-5	Literature Cited . . . . .	1114

**80 Selenium**

L. O. FINE	
80-1 Introduction . . . . .	1117
80-2 Total Selenium . . . . .	1118
80-3 Availability Indexes . . . . .	1122
80-4 Literature Cited . . . . .	1123

**81 Chlorine and Bromine**

P. R. STOUT AND C. M. JOHNSON

81-1 Introduction . . . . .	1124
81-2 Principles . . . . .	1125
81-3 Potentiometric Method for Chloride . . . . .	1127
81-4 Microdiffusion Method for Chloride and Bromide . . . . .	1130
81-5 Microdiffusion Method for Bromide . . . . .	1133
81-6 Literature Cited . . . . .	1134

**82 Fluorine**

ROBERT F. BREWER

82-1 Introduction . . . . .	1135
82-2 Total Fluorine . . . . .	1136
82-3 Water-Soluble Fluorine . . . . .	1145
82-4 Literature Cited . . . . .	1147

**83 Total Nitrogen**

J. M. BREMNER

83-1 Introduction . . . . .	1149
83-2 Principles . . . . .	1152
83-3 Regular Macro-Kjeldahl Method . . . . .	1162
83-4 Macro-Kjeldahl Method to Include Nitrate . . . . .	1164
83-5 Macro-Kjeldahl Method to Include Nitrate and Nitrite . . . . .	1164
83-6 Comments on Macro-Kjeldahl Methods . . . . .	1166
83-7 Semimicro-Kjeldahl Method . . . . .	1171
83-8 Addendum . . . . .	1175
83-9 Literature Cited . . . . .	1176

**84 Inorganic Forms of Nitrogen**

J. M. BREMNER

84-1 General Introduction . . . . .	1179
84-2 Extraction of Exchangeable Ammonium, Nitrate, and Nitrite . . . . .	1185
84-3 Exchangeable Ammonium, Nitrate, and Nitrite by Steam Distillation Methods . . . . .	1191
84-4 Exchangeable Ammonium, Nitrate, and Nitrite by Microdiffusion Methods . . . . .	1206
84-5 Nitrate by Colorimetric Methods . . . . .	1212
84-6 Nitrite by Colorimetric Methods . . . . .	1219
84-7 Nonexchangeable Ammonium . . . . .	1224
84-8 Literature Cited . . . . .	1232

## 85 Organic Forms of Nitrogen

J. M. BREMNER	
85-1 Introduction . . . . .	1238
85-2 Principles . . . . .	1241
85-3 Acid Hydrolysis Method . . . . .	1247
85-4 Literature Cited . . . . .	1254

## 86 Isotope-Ratio Analysis of Nitrogen in Nitrogen-15 Tracer Investigations

J. M. BREMNER	
86-1 General Introduction . . . . .	1256
86-2 General Principles . . . . .	1259
86-3 Conversion of Labeled Nitrogen to Ammonium . . . . .	1262
86-4 Conversion of Ammonium to Nitrogen Gas . . . . .	1269
86-5 Determination of Isotopic Composition of Nitrogen Gas . . . . .	1274
86-6 Addendum . . . . .	1282
86-7 Literature Cited . . . . .	1283

## 87 Various Forms of Nitrogen

H. H. CHENG AND J. M. BREMNER	
87-1 General Introduction . . . . .	1287
87-2 Chemical Methods . . . . .	1289
87-3 Physical Methods . . . . .	1304
87-4 Literature Cited . . . . .	1318

## 88 Nitrogen Availability Indexes

J. M. BREMNER	
88-1 Introduction . . . . .	1324
88-2 Principles . . . . .	1338
88-3 Method . . . . .	1339
88-4 Literature Cited . . . . .	1341

## 89 Total Carbon

L. E. ALLISON, W. B. BOLLEN, AND C. D. MOODIE

89-1 General Introduction . . . . .	1346
89-2 Total Carbon by Wet Combustion . . . . .	1347
89-3 Total Carbon by Dry Combustion . . . . .	1353
89-4 Literature Cited . . . . .	1365

## 90 Organic Carbon

L. E. ALLISON

90-1 General Introduction . . . . .	1367
90-2 Combustion Methods With Measurement of Carbon Dioxide . . . . .	1368
90-3 Walkley-Black Method . . . . .	1372
90-4 Schollenberger Method . . . . .	1376
90-5 Literature Cited . . . . .	1378

**91 Carbonate****L. E. ALLISON AND C. D. MOODIE**

91-1	Introduction . . . . .	1379
91-2	Vacuum-Distillation and Titration Method . . . . .	1380
91-3	Gravimetric Method . . . . .	1385
91-4	Acid-Neutralization Method . . . . .	1387
91-5	Gravimetric Method for Loss of Carbon Dioxide . . . . .	1388
91-6	Volumetric Calcimeter Method . . . . .	1389
91-7	Pressure-Calcimeter Method . . . . .	1392
91-8	Literature Cited . . . . .	1396

**92 Organic Matter****F. E. BROADBENT**

92-1	Introduction . . . . .	1397
92-2	Principles . . . . .	1398
92-3	Method . . . . .	1398
92-4	Literature Cited . . . . .	1400

**93 Partial Extraction of Organic Matter****L. MORTENSEN**

93-1	Introduction . . . . .	1401
93-2	Composition and Solubility of Soil Organic Matter . . . . .	1402
93-3	Pretreatment . . . . .	1403
93-4	Extractants . . . . .	1404
93-5	Literature Cited . . . . .	1407

**94 Gross Chemical Fractionation of Organic Matter****J. STEVENSON**

94-1	General Introduction . . . . .	1409
94-2	Proximate Analysis . . . . .	1409
94-3	Fractionation of Humus . . . . .	1414
94-4	Fractionation of Fulvic Acid . . . . .	1417
94-5	Literature Cited . . . . .	1420

**95 Inositol Hexaphosphate****F. J. STEVENSON**

95-1	Introduction . . . . .	1422
95-2	Principles . . . . .	1423
95-3	Method . . . . .	1424
95-4	Literature Cited . . . . .	1427

**96 Amino Sugars****F. J. STEVENSON**

96-1	Introduction . . . . .	1429
96-2	Colorimetric Method . . . . .	1429
96-3	Alkaline Decomposition Method . . . . .	1433
96-4	Literature Cited . . . . .	1436

## 97 Amino Acids

F. J. STEVENSON

97-1	Introduction	1437
97-2	Distribution of Nitrogen According to the Van Slyke Method	1438
97-3	Ion Exchange Chromatography of the Amino Acids in Soil Hydrolysates	1443
97-4	Free Amino Acids	1448
97-5	Literature Cited	1450

## 98 Microbial Populations by Direct Microscopy

LLOYD R. FREDERICK

98-1	General Introduction	1452
98-2	Thin-Section Technique	1453
98-3	Smear-Ratio Technique	1455
98-4	Contact-Slide Technique	1457
98-5	Literature Cited	1459

## 99 Agar-Plate Method for Total Microbial Count

FRANCIS E. CLARK

99-1	Introduction	1460
99-2	Principles	1461
99-3	Method	1462
99-4	Literature Cited	1466

## 100 Most-Probable-Number Method for Microbial Populations

M. ALEXANDER

100-1	Introduction	1467
100-2	Principles	1467
100-3	Method	1469
100-4	Literature Cited	1472

## 101 Aerobic Spore-Forming Bacteria

FRANCIS E. CLARK

101-1	Introduction	1473
101-2	Principles	1473
101-3	Method	1475

## 102 Nitrifying Bacteria

M. ALEXANDER AND FRANCIS E. CLARK

102-1	Introduction	1477
102-2	Principles	1478
102-3	Method for Most Probable Number of <i>Nitrosomonas</i>	1479
102-4	Method for Most Probable Number of <i>Nitrobacter</i>	1480
102-5	Method for Isolation of <i>Nitrosomonas</i> in Pure Culture	1481
102-6	Method for Isolation of <i>Nitrobacter</i> in Pure Culture	1482
102-7	Comments	1482
102-8	Literature Cited	1483

**103 Denitrifying Bacteria****M. ALEXANDER**

103-1	Introduction	1484
103-2	Principles	1484
103-3	Method	1485
103-4	Literature Cited	1486

**104 Rhizobia****FRANCIS E. CLARK**

104-1	Introduction	1487
104-2	Principles	1487
104-3	Method for Isolating Rhizobia from Root Nodules	1488
104-4	Method for Detecting Rhizobia in Soil	1489
104-5	Method for Most Probable Number of Rhizobia in Soil	1490
104-6	Method for Culture of Rhizobia From Soil	1491
104-7	Literature Cited	1492

**105 Azotobacter****FRANCIS E. CLARK**

105-1	Introduction	1493
105-2	Principles	1493
105-3	Soil-Plaque or Mud-Pie Method	1494
105-4	Plate-Count Method	1495
105-5	Most-Probable-Number Method	1496
105-6	Literature Cited	1497

**106 Actinomycetes****FRANCIS E. CLARK**

106-1	Introduction	1498
106-2	Method	1499
106-3	Literature Cited	1501

**107 Fungi****D. MENZIES**

107-1	Introduction	1502
107-2	Principles	1503
107-3	Method	1504
107-4	Literature Cited	1505

**108 Algae****FRANCIS E. CLARK AND I. W. DURRELL**

108-1	Introduction	1506
108-2	Soil-Block Method	1507
108-3	Most-Probable-Number Method	1509
108-4	Direct Fluorescence Microscopy	1510
108-5	Literature Cited	1512

## 109 Protozoa

	FRANCIS E. CLARK AND W. E. BEARD	
109-1	Introduction . . . . .	1513
109-2	Method . . . . .	1514
109-3	Literature Cited . . . . .	1516

## 110 Nematodes

	JACK ALTMAN	
110-1	Introduction . . . . .	1517
110-2	Baermann Funnel Technique . . . . .	1518
110-3	Wet Sieving Technique, or Tyler Screen Method . . . . .	1520
110-4	Literature Cited . . . . .	1523

## 111 Mites and Other Microarthropods

	TYLER A. WOOLLEY	
111-1	Introduction . . . . .	1524
111-2	Principles . . . . .	1525
111-3	Methods . . . . .	1526
111-4	Comments . . . . .	1533
111-5	Literature Cited . . . . .	1535

## 112 Enzymes

	LYNN K. PORTER	
112-1	Introduction . . . . .	1536
112-2	Principles . . . . .	1537
112-3	Method for Urease Activity . . . . .	1545
112-4	Literature Cited . . . . .	1547

## 113 Microbial Respiration

	G. STOTZKY	
113-1	Introduction . . . . .	1550
113-2	Field versus Laboratory Measurements . . . . .	1552
113-3	Incubation Techniques . . . . .	1553
113-4	Analysis for Carbon Dioxide . . . . .	1556
113-5	Analysis for Oxygen . . . . .	1558
113-6	Method for Carbon Dioxide Evolution . . . . .	1562
113-7	Method for Respiratory Quotient . . . . .	1566
113-8	Literature Cited . . . . .	1569
