Contents

CHAPTER		PAGE
1	THE DEVELOPMENT OF AGRICULTURE	1
	Ancient Agriculture	1
	Roman Agriculture	2
	Farming after the Fall of Rome	3
	Beginning of Scientific Agriculture	4
	Early Chemistry and Its Application to Plants	6
2	ESSENTIALS FOR PLANT GROWTH	11
	Soil Fertility vs. Productivity	11
	Temperature and Growth	12
	Light Requirement of Plants	20
	Water and the Growth of Plants	23
	The Plant and the Atmosphere	27
	Nutrient Requirement of Plants	31
3	THE SOIL SOLUTION AND NUTRIENT ABSORPTION BY PLANTS	34
	The Soil Solution	34
	The Nutrient Intake of Plants	38
	Factors Affecting Nutrient Absorption	40
4	COLLOIDS AND SOIL PRODUCTIVITY	50
	The Colloidal Content of Soils	50
	Constituents of Soil Colloids	52
	The Clay Minerals	52
	Processes of Ion Adsorption and Exchange	58
	Ion Fixation and Soil Productivity	61
5	SOIL REACTION AND LIMING	64
	Causes and Nature of Soil Acidity	64
	Development of Saline and Alkali Soils	66
	Determination and Expression of Soil Reaction	67
	Soil Reaction and Plant Growth	74
	Changing the Reaction of Soils	76
6	SOIL ORGANIC MATTER	81
	Nature of Materials Which Contribute to Soil Organic Matter	81
	Chemical, Biological, and Physical Properties of the Organic Fraction in Soils	85
	Additions and Losses of Soil Organic Matter	91

CHAPTER		PAGE
7	NITROGEN AND CROP PRODUCTION	103
	Nitrogen Requirements of Plants	103
	Nitrogen Content of Soils	105
	Loss of Nitrogen from the Soil	115
	Additions of Nitrogen to the Soil	120
	Nitrogen Fertilizers	126
8	PHOSPHORUS	139
	Phosphorus Content of Soils	139
	Removal of Phosphorus from the Soil	156
	Return and Addition of Phosphorus to the Soil	160
	Phosphorus Fertilizers	163
9	POTASSIUM	176
	Potassium Content of Soils	176
	Removal of Potassium from the Soil	183
	Addition and Return of Potassium to the Soil	190
	Potassium Fertilizers	191
10	CALCIUM AND MAGNESIUM	194
	Calcium and the Soil	194
	Relationship of Calcium to Plant Growth	197
	Quantities and Reactions of Magnesium in Soils	203
	Magnesium and the Growth of Plants	206
11	SULFUR	209
	The Sulfur Content of Soils	210
	Additions of Sulfur to Soils	214
	Removal of Sulfur in Crops and by Leaching	217
	Changes Which Sulfur Undergoes in Soils and Effect of Sulfates on Soil Properties	219
	Forms and Functions of Sulfur in Plants	220
	The Need for Sulfur Applications in Crop Production	221
12	MICRO AND SOME NON-ESSENTIAL NUTRIENTS	224
	Manganese	225
	Copper	228
	Boron	232
	Zinc	235
	Molybdenum	239
	Sodium	242
	Silicon	244
	Other Elements	245
13	SOIL DEFICIENCIES AND DETERMINATION OF NUTRIENT NEEDS OF CROPS	248
	Meaning of "Available" Plant Nutrients	248
	Early Efforts to Determine Supplies of Available Nutrients	249
	Rapid Soil-Testing Methods	252
	Plant Analysis and Tissue Testing	253
	Nutrient-Deficiency Symptoms in Plants	259

CHAPTER PAGE

Plant-Growth Methods 268
Growth of Microorganisms as an Indicator of Soil-Nutrient Supply 271
Mitscherlich's Theory and Present-Day Agrobiology 273

14 Activities of Soil Organisms That Affect Productivity 283
Improvement in Soil Physical Condition by Organisms 284
Chemical Changes in Soil Constituents Produced by Organisms 287
Additions of Nitrogen to Soils through Biological Fixation 292

15 Green Manures, Crop Residues, and Composts 299
Green Crops for Soil Protection and Improvement 300
Crop Residues and Sods 312
Composts and Municipal Wastes as Fertilizers and Soil Amendments 322

16 Animal Manures 329
Regional Fertilizer Use and Nutrient Content of Manure 329
Production and Composition of Manure 332
Recovery in Manure of Nutrients in Feed 335
Handling and Conservation of Manure 338
Manure and Crop Production 342

17 Contributions of Commercial Fertilizers to Soil Productivity 349
Production and Use of Fertilizers in the United States 349
Fertilizer Application for Different Crops 353
Returns from Application of Fertilizer 354

18 Rotations and Farming Systems 357
Cash-Crop Production in the Central West 358
Crop Rotations in Northeastern United States and Canada 363
Southern Cropping Systems 367
Cropping Systems Used in Dryland Farming 376
Rotations on Irrigated Land 385
Cash-Crop vs. Livestock Farming 387
Limitation in Rotation Benefits 392

19 A Summary of Old Field Experiments 395
The Rothamsted Experiment Station 396
Field Studies in Illinois 400
Fertilizer Experiments in Pennsylvania 405
The Ohio Experimental Farms 407
Missouri's Sanborn Field 411
The Rhode Island Rotation Tests 417
Alabama's Old Rotation 418
Cylinder Studies in New Jersey 419
Washington's Wheat Cultural Experiments 421
