Part I : Farmland Erosion Control		
Chapter 1	Introduction	1
Chapter 2	Hillside Ditches	8
Chapter 3	Grass Planting in Hillside Ditches	12
Chapter 4	Bench Terraces	14
Chapter 5	Planting Grass on Risers	19
Chapter 6	Broad-based Terraces	21
Chapter 7	Stone Walls	25
Chapter 8	Grass Barriers	27
Chapter 9	Contour Planting	29
Chapter 10	Cover Crops	30
Chapter 11	Green Manure	32
Chapter 12	Mulching	33
Chapter 13	Windbreaks	34
Chapter 14	Diversion Ditches	37
Chapter 15	Drainage Ditches	53
Chapter 16	Grassed Waterways	67
Chapter 17	Drop Structures	72
Chapter 18	Culverts (small)	80
Chapter 19	L-shaped Roadside Ditches	83
Chapter 20	Dips	85
Chapter 21	Access Roads	88
Chapter 22	Link roads	90
Chapter 23	Farm Paths	92
Chapter 24	Vegetative Sideslope Stabilization	94
Chapter 25	Grassed Farm Roads	97
Chapter 26	Gully Control	98
Chapter 27	Check Dams	102
Chapter 28	Farmland Shaping	120
Chapter 29	Sediment Basin	123
Chapter 30	Slopedland Irrigation	129
Chapter 31	Water Source Facilities	133
Chapter 32	Pumping Facilities	135
Chapter 33	Water Conveyance Facilities	143
Chapter 34	Farm Ponds	150
Chapter 35	Water Storage Tanks	152
Chapter 36	Conservation Farm Planning	153
Appendix 1	Soil loss Estimation	159
Appendix 2	Farmland Shaping – Earth Volume Calculation	175
Appendix 3	Slopedland Use Capability Classification	179
Appendix 4	Table of Slope Degree / Gradient Conversion	185
Appendix 5	Runoff Estimation	186
Appendix 6	Table of Bench Terracing Earth Volume	191
Appendix 7	Table of Calculation of Requirements for Construction Materials	195
Appendix 8	Conversion of Weights and Measures	204
Appendix 9	Distribution of Slopedlands at Various Elevations in Taiwan	207

Part II : Engineering Work

I.	General Description	
	Chapter 1	Control of Wild Creeks 1
	Chapter 2	Torrent Control 4
	Chapter 3	Investigation and Treatment of Landslides 6
	Chapter 4	Control of Debris Flow 10
	Chapter 5	Sideslope Stabilization 15
	Chapter 6	Erosion Control for Roads 18
	Chapter 7	Erosion and Sediment Control in Mining Areas 22
	Chapter 8	Slopeland Drainage Systems 28
	Chapter 9	Erosion and Sediment Control for Development Sites 31
	Chapter 10	Runoff Detention Facilities 36
II.	Specifications of Individual Structures	
	Chapter 1	Check Dams 39
	Chapter 2	Submerged Dams 55
	Chapter 3	Spur Dikes 56
	Chapter 4	Levees 60
	Chapter 5	Revetments 63
	Chapter 6	River Regulation 65
	Chapter 7	Earth Dams 72
	Chapter 8	Retaining Walls 88
	Chapter 9	Earth Dumping Sits 97
	Chapter 10	Drainage Facilities 102
	Chapter 11	Silting basins 122
	Chapter 12	Runoff Detention Dams 125
III.	Engineering Construction and Maintenance	133
IV.	Appendices	
	1.	Hydrological Analysis 150
	2.	Concrete Design and Construction Specifications 158
	3.	Design of Retaining Walls 168
	4.	Design of Check Dams 177

Part III : Vegetative Measures

Chapter 1	Introduction	1
	1.1	Scope 1
	1.2	Definitions and Functions of Vegetation 1
	1.3	Design Principles 1
Chapter 2	Site Preparation	7
	2.1	Purpose 7
	2.2	Site Improvement 7
	2.3	Drainage Facilities 8
	2.4	Hillside Foundation Work 8
Chapter 3	Application Methods	17
	3.1	Direct Seeding 17
	3.2	Hydroseeding 17
	3.3	Vegetation Belt Pavement 19
	3.4	Revegetation with Seeds in Borrowed-Soil Bags 20
	3.5	Grass Spring Planting 20
	3.6	Sodding 21
	3.7	Planting with Container-grown Seedlings 22
Chapter 4	Revegetation in Problem Areas	24
	4.1	Revegetation in Tablelands with Red Soils 24
	4.2	Revegetation of Mudstone Areas 24
	4.3	Revegetation of Mining Areas 25

4.4	Revegetation of Coastal Areas	26
Chapter 5	Maintenance and management	29
5.1	Watering	29
5.2	Fertilization	29
5.3	Replanting	30
5.4	Pest and Disease Control	30
Chapter 6	Survey and Analysis of Vegetation	36
6.1	Measurement of Vegetative Population	36
6.2	Size of Quadrat	36
6.3	Integration of Population Measurements	36
6.4	Importance Value Index (IVI)	36
6.5	Determination of Species Diversity	37
6.6	Seed Germination Rate	37
6.7	Coverage	38
