Chapter 1 Introduction1..

Shimshon Ben-Yehoshua

SECTION I Physical Treatments

Chapter 2 Heat Treatments to Reduce Decay 11

Shimshon Ben-Yehoshua and Ron Porat

Chapter 3 Heat Treatments to Reduce Chilling Injury and
Superficial Scald43

Susan Lurie

Chapter 4 Modified Atmosphere Packaging and Controlled
Atmosphere Storage.....61

*Shimshon Ben-Yehoshua, Randolph M. Beaudry, Svetlana Fishman,
Sastry Jayanty, and Nazir Mir*

Chapter 5 Innovations in Quarantine..... 113

Elizabeth J. Mitcham

Chapter 6 Minimizing the Harmful Effects of Ethylene on the Quality
of Fruit and Vegetables 133

R.B.H. Wills

Chapter 7 Fresh-Cut Produce..... 149

Alley E. Watada, Hidemi Izumi, Yaguang Luo, and Victor Rodov

Chapter 8 Innovative Environmentally Friendly Technologies to
Maintain Quality of Durable Agricultural Produce.....205

Shlomo Navarro and Jonathan Donahaye

SECTION II Nonphysical Treatments

Chapter 9 UV Irradiation, Biological Agents, and Natural Compounds for Controlling Postharvest Decay in Fresh Fruits and Vegetables	265
<i>Shimshon Ben-Yehoshua and Julien Mercier</i>	
Chapter 10 Edible Coatings	301
<i>Elizabeth A. Baldwin</i>	
Chapter 11 Hormonal Regulation of Ripening and Senescence Phenomena	3.15
<i>Joshua D. Klein and Eliezer E. Goldschmidt</i>	
Chapter 12 Why Fruits and Vegetables Are Good for Health.....	333
<i>Jenny H. Ekman and Brian D. Patterson</i>	
Chapter 13 Use of Genetic Engineering to Control Ripening, Reduce Spoilage, and Maintain Quality of Fruits and Vegetables.....	397
<i>Jean-Claude Pech, Anne Bernadac, Mondher Bouzayen, and Alain Latché</i>	
Chapter 14 Innovations in Transportation	439
<i>James F. Thompson and Patrick E. Brecht</i>	
Chapter 15 How Postharvest Technologies Affect Quality	447
<i>Chris B. Watkins and Jenny H. Ekman</i>	
Index	493
