Working Party on Bulletin	
Foreword	iv
Chapter 1 Introduction	
LIVESTOCK WASTES AND THE FARMING SYSTEM	
THE LIVESTOCK WASTES PROBLEM .	
Change on the farm	2
Change off the farm	2
The resultant problem	3
The development of the problem	4
The scope of the problem	5
The smell nuisance	5
RESEARCH INTO THE PROBLEM	
A new field	6
The development of research	6
Official programmes and their findings	7
REFERENCES	
Chapter 2 Characteristics and Biodegradation of Farm Livestock Wastes	9
INTRODUCTION	
QUANTITY AND TOTAL SOLIDS OF LIVESTOCK EXCRETA	9
COMPOSITION OF LIVESTOCK EXCRETA	9
QUANTITY AND COMPOSITION OF SLURRY	
BIODEGRADABILITY OF LIVESTOCK EXCRETA	
THE PRINCIPLES OF BIOLOGICAL TREATMENT OF SLURRY	18
Dissolved oxygen	19
Concentration of available substrate	19
Microbial population	20
Substrate loading rate	20
Mean solids residence time (SRT)	20
pH	21
Temperature	21
Toxic materials	21

	<i>Page</i>
EXPERIMENTAL STUDIES ON AEROBIC TREATMENT	21
Piggery slurry	22
<i>Loading rate and mean residence time</i>	22
<i>Concentration of slurry</i>	22
<i>pH value and nitrification</i>	22
<i>Oxygen consumption and COD removal</i>	23
<i>Sludge production</i>	23
<i>Quality of supernatant of mixed liquor</i>	24
<i>Effects of temperature</i>	24
<i>Toxic effects</i>	25
Poultry and beef cattle slurry	25
Treatment of coarse filtrate	25
Biological filters	26
Conclusions	26
EXPERIMENTAL STUDIES ON ANAEROBIC TREATMENT	27
Loading rate and mean residence time	28
Operation and commissioning of digesters	28
Sludge production	28
Gas production	28
Quality of treated slurry	28
Effect of temperature	29
Conclusions	29
MICROBIOLOGICAL STUDIES	29
Bacterial populations of aerobic treatment systems	29
Protozoa populations of aerobic treatment systems	34
Bacterial populations of anaerobic digesters	35
REFERENCES	37
Chapter 3 The Treatment of Farm Livestock Wastes, Methods and Equipment	39
INTRODUCTION	39
SEPARATION OF SLURRY INTO SOLIDS AND LIQUIDS	40
Mechanical solid/liquid separation	42
<i>Rotary screen</i>	44
<i>Brushed screen</i>	44
<i>Vibrating screen</i>	46
<i>Rotary screen press</i>	46
<i>Screw press</i>	46
<i>Belt press</i>	46
<i>Centrifuge</i>	47
<i>Liquid cyclone (Hydrocyclone)</i>	47
<i>Pressure filter</i>	47

	<i>Page</i>
<i>Vacuum filter</i>	48
Gravity solid/liquid separation	48
Drying	49
BIOLOGICAL TREATMENT	51
Aerobic treatment	51
<i>Surface aeration</i>	52
<i>Coarse bubble aeration</i>	52
<i>Oxidation ditch</i>	54
<i>High rate biological filters</i>	56
<i>Plunging jet aeration</i>	59
<i>Composting</i>	60
<i>Combustion</i>	62
Anaerobic treatment	63
SLUDGE SETTLEMENT AND DEWATERING	63
Flocculation	64
De-watering	67
REFERENCES	68
Chapter 4 Application of Farm Livestock Wastes to Land	71
INTRODUCTION	71
CHARACTERISTICS OF SLURRY	71
FACTORS AFFECTING SUITABLE SPREADING LEVELS	73
Crop and soil effects	73
<i>Effects on grass</i>	73
<i>Effects on forage maize</i>	81
<i>Effects on soil and soil atmosphere</i>	81
<i>Effects on soil microorganisms</i>	84
<i>Effects on soil invertebrates</i>	85
Hydraulic loading of land	86
Bacteriological contamination of drainage water	89
Nutrient removal by crops	90
Long term management considerations	91
Conclusions on rates for utilization	95
SMELLS	95
SURVIVAL AND TRANSMISSION OF PATHOGENS	97
STORAGE, TRANSPORT AND SPREADING OF SLURRY	99
SLURRY SEPARATION	100
REFERENCES	101

Chapter 5 Farm Trials of Experimental Treatment Plants. A Summary of seven Case-studies	103
INTRODUCTION	103
BOXWORTH EXPERIMENTAL HUSBANDRY FARM	105
The farm effluents	105
The objectives of the work	105
The design of the plant	105
The performance of the plant	108
CULBAE FARM	108
The farm effluents	108
The objectives of the work	108
The evaluation of water pollution problems	108
The design of the plant	109
The performance of the plant	110
GREAT HOUSE EXPERIMENTAL HUSBANDRY FARM	112
The farm effluents	112
The objectives of the work	112
The design of Plant I	112
The performance of Plant I	112
The design of Plant II	114
The performance of Plant II	116
LANE END FARM	116
The farm effluents	116
The objectives of the work	117
Trial I	117
Trial II	117
Trial III	118
SONNING FARM	121
The farm effluents	121
The objectives of the work	121
The design of the plant	121
The performance of the plant	121
TERRINGTON EXPERIMENTAL HUSBANDRY FARM	123
The farm effluents	123
The objective of the work	123
The design of the plant	124
The performance of the plant	124
TRAWSCOED EXPERIMENTAL HUSBANDRY FARM	125
The farm effluents	125
The objectives of the work	125
The design of the plant	125
The performance of the plant	127
DISCUSSION	127
REFERENCES	130

Chapter 6 Recommendations for Future Research	131
DEFINITION OF PROBLEMS	131
CURRENT APPRAISAL	131
TREATMENT BEFORE APPLICATION TO THE LAND	133
UTILISATION ON LAND	135
ALTERNATIVE USES OF SLURRY	137
HAZARDS IN SLURRY HANDLING	138
Appendix 1	141
Tables showing agricultural trends relevant to the development of the farm livestock wastes problem	141
Appendix 2	144
List of centres participating in the research and development pro- grammes ending in April 1974 on farm livestock wastes management of the Agricultural Research Council and the Ministry of Agriculture, Fisheries and Food with short descriptions of the projects undertaken	144
Appendix 3	147
Abbreviations, terms and units used for farm livestock wastes and treatment systems	147
Index	153
