## NEW FERTILIZER MATERIALS

<b>1</b>	<b>Ureaform (Urea Formaldehyde)</b>	<b>1</b>
	<i>Robert J. Church, E.I. du Pont de Nemours &amp; Co., Wilmington, Delaware, U.S.A.</i>	
	Introduction	1
	Chemical and Physical Properties	1
	Manufacture of Ureaform	2
	Uses and Markets	4
	Agronomic Aspects of Ureaform	8
	Method of Analysis	12
	Bibliography	14
<b>2.</b>	<b>Crotonylidenediurea = CDU</b>	<b>16</b>
	<i>Dr. J. Jung and Dr. O.H. Detmer, Badische Anilin- &amp; Soda-Fabrik AG, Ludwigshafen am Rhein, Germany</i>	
	History	16
	Chemistry and Manufacture	17
	Fertilizer Uses	18
	Action of CDU and Agronomic Aspects	19
	Methods of Analysis	25
	Bibliography	27
<b>3.</b>	<b>Isobutylidene Diurea = IBDU</b>	<b>28</b>
	<i>Dr. Masao Hamamoto, Mitsubishi Chemical Industries Ltd., Kawasaki City, Kanagawa-Ken, Japan</i>	
	History	28
	Chemical and Physical Properties	28
	Manufacture	30
	Fertilizer Uses	30
	Agronomic Aspects	31
	Method of Analysis	37
	Bibliography	37
<b>4.</b>	<b>Superphosphoric Acid</b>	<b>38</b>
	<i>Christopher J. Pratt, Mobil Chemical Company, New York, New York, U.S.A.</i>	
	Synopsis	38
	Wet-Process Superphosphoric Acid	38
	Phosphorus-Derived Superphosphoric Acid	62
	Storage, Handling and Transportation	67
	Commercial Considerations and End Uses	68
	References	69

## Contents

<b>5. Triple Superphosphate of 55% P<sub>2</sub>O<sub>5</sub> Content</b>	<b>71</b>
<i>M.M. Striplin, Jr., Tennessee Valley Authority, Muscle Shoals, Alabama, U.S.A.</i>	
Introduction	71
Summary	73
Manufacturing Processes	73
Agronomic Considerations .	79
Distribution	81
References	81
<b>6. Ammonium Phosphates</b>	<b>83</b>
<i>Ronald D. Young, Tennessee Valley Authority, Muscle Shoals, Alabama, U.S.A.</i>	
History	83
Chemistry - Chemical and Physical Properties	84
Processes for Manufacture	85
Combination of Ammonium Phosphate with Other Fertilizer Materials	93
Methods of Analysis and Chemical Control	95
Agronomic Characteristics	95
Other Uses	96
References	97
<b>7. Ammonium Polyphosphate</b>	<b>98</b>
<i>M.R. Siegel and J.M. Stinson, Tennessee Valley Authority, Muscle Shoals, Alabama, U.S.A</i>	
Introduction	98
Chemical Properties of Pure Ammonium Polyphosphate	99
Production from Superphosphoric Acid	99
Thermal Dehydration of Solid Ammonium Orthophosphate	103
Direct Production from Wet-Process Orthophosphoric Acid	103
Miscellaneous Uses and Properties of Ammonium Polyphosphate	104
Agronomic Characteristics	106
Methods of Analyses	107
References	119
<b>8. Nitrophosphates</b>	<b>121</b>
<i>Y.F. Berquin, Potasse &amp; Engrais Chimiques, Paris, France and L. Audidier, Etablissement George Truffauts, Paris, France</i>	
Introduction	121
Physical and Chemical Characteristics of Nitrophosphates	122
Removal of Calcium Nitrate	124
Manufacturing Processes	131
The Pec and Similar Processes	133
Agronomic Considerations	136
Methods of Analysis	139
Bibliography	141
Patents	141
<b>9. Nitrate of Potash</b>	
<i>Y. Araten, Israel Mining Industries, Institute for Res. &amp; Dev., Haifa, Israel</i>	
<i>J. Bryn, Southwest Potash Corporation, New York, New York, U.S.A.</i>	
<i>K.D. Jacob, formerly Head, Fertilizer Investigation Research Branch, U.S. Dept. of Agriculture, Beltsville, Maryland, U.S.A.</i>	
History and Sources	

## Contents

Chemical and Physical Properties	147
Manufacturing Processes	152
Fertilizer Aspects and Agronomic Use	158
Nitrate of Potash as a Fertilizer for Specific Crops	161
Other Characteristics of Nitrate of Potash	168
Addition of Nitrate of Potash to Ammonium Nitrate	174
Analysis	175
Bibliography	177
<b>10. Potassium Metaphosphate (Potassium Polyphosphate)</b>	
<i>Dr. Suzanna Scherzer and Dr. J. Hagin, Technion - Israel Institute of Technology, Haifa, Israel</i>	
Abstract	182
Introduction	182
Chemical and Physical Properties	183
Manufacture	186
Fertilizer Uses	189
Methods of Analysis	194
References	195
<b>11. Monopotassium Phosphate and Monopotassium Phosphate-Monoammonium Phosphate</b>	
<i>Y. Araten, Israel Mining Industries, Institute for Research &amp; Development, Haifa, Israel</i>	
Introduction	199
History	199
Chemical and Physical Properties	200
Manufacture of Monopotassium Phosphate	201
Agricultural Considerations	201
Greenhouse Experiments with Monopotassium Orthophosphate (MPP) and its Behavior in the Soil	205
Methods of Analysis	206
Appendix (Studies on Monopotassium Orthophosphate)	208
Introduction	208
Monopotassium Orthophosphate as a K-P Fertilizer	208
Behavior of Monopotassium Phosphate in Soil	210
Bibliography	220
<b>12. Magnesium Fertilizers</b>	<b>223</b>
Section 1 - Magnesium as a Plant Nutrient	223
<i>Y. Araten and S. Lavie, Israel Mining Industries, Institute for Research &amp; Development, Haifa, Israel and Dr. G.L. Bridger, Georgia Institute of Technology, Atlanta, Georgia</i>	
Introduction	223
Functions of Magnesium	223
Plant and Animal Requirements of Magnesium	224
Magnesium Deficiency and Increase of Crop Yields Due to Magnesium	226
The Various Magnesium Fertilizers	229
Bibliography	235
Section 2 - Magnesium Phosphates	237
<i>Y. Araten and S. Lavie, Israel Mining Industries, Institute for Research &amp; Development, Haifa, Israel</i>	

Magnesium-Phosphorus Relationship	237
Slags Containing P and Mg	238
Magnesium Orthophosphate	239
Fused Magnesium Phosphate	240
IMI (Israel Mining Industries) Magnesium Phosphate	243
Methods of Analysis	247
Appendix 1	248
Various Processes for Production of Magnesium Phosphate Fertilizers	
Appendix 2	249
Greenhouse Tests with Magnesium Phosphate	
Bibliography	255
<b>Section 3 - Magnesium Ammonium Phosphate &amp; Related Compounds</b>	<b>256</b>
<i>Dr. G.L. Bridger, Georgia Institute of Technology, Atlanta, Georgia</i>	
Magnesium Ammonium Phosphate	256
History	256
Chemical and Physical Properties	257
Preparation	258
Commercial Production	260
Fertilizer Uses	260
Other Metal Ammonium Phosphates	274
Chemical and Physical Properties	274
Preparation	275
Agronomic Properties	275
Metal Potassium Phosphates	277
Chemical and Physical Properties	277
Preparation	278
Agronomic Properties	278
References	283
<b>13 Sulfur as a Fertilizer</b>	<b>285</b>
<i>Dr. S.L. Tisdale, The Sulfur Institute, Washington, D.C. U.S.A</i>	
Introduction	285
Forms and Properties of Elemental Sulfur	287
Production Processes	291
Sulfur Fertilizers	294
Behavior of Sulfur and its Compounds in Soils	302
Sulfur and Soil Acidity	310
Crop Responses to Sulfur Fertilizers	311
Summary	315
Bibliography	316
<b>II. POTENTIAL NEW FERTILIZERS</b>	
<b>14. Oxamide</b>	<b>320</b>
<i>Dr. G.L. Terman and Dr. J.D. Fleming, National Fertilizer Development Center, Muscle Shoals, Alabama</i>	
Properties	320
Manufacture	320
Agronomic Use	321

## Contents

15.	<b>Urea Nitrate</b> <i>Dr. G.L. Terman and Dr. J.D. Fleming, National Fertilizer Development Center, Muscle Shoals, Alabama</i>	
	Properties	323
	Manufacture	323
	Uses	323
16.	<b>Urea Phosphate</b> <i>Dr. G.L. Terman and Dr. J.D. Fleming, National Fertilizer Development Center, Muscle Shoals, Alabama</i>	
	Properties	325
	Manufacture	325
	Agronomic Uses	326
	References for Chapters 14, 15 and 16	326
17	<b>The Hydrides of Phosphorus</b> <i>F. Hunter, University of Newcastle-upon-Tyne, United Kingdom</i>	
	History	327
	Chemical and Physical Properties	327
	Manufacture	328
	Fertilizer Uses	328
	Agronomic Aspects	329
	Bibliography	329
18.	<b>Red Phosphorus</b> <i>Dr. H.P. Rothbaum, Dept. of Scientific and Industrial Research, Wellington, New Zealand</i>	
	Introduction	330
	Manufacture of Red Phosphorus	331
	Oxidation Rates of Red Phosphorus in Soil	331
	Oxidation Products of Red Phosphorus	333
	Fire Hazard	334
	Red Phosphorus/Copper Hydroxide Mixtures as Potential Fertilizers	334
	Plant Trials	335
	Summary	336
	References	338

### III. APPLICATION EQUIPMENT & NEW FERTILIZER USE

19.	<b>Fertilizer Application Equipment</b> <i>Dr. Ray B. Diamond and Frank P. Achorn, Tennessee Valley Authority, Muscle Shoals, Alabama</i>	
	Ground Operated Dry Fertilizer Distributors	340
	Fluid Fertilizer Application Equipment	358
	Aerial Application	373
	Application Through Irrigation Systems	383
	References	391

## Contents

20.	Modern Use of Fertilizer	393
	<i>Dr. Werner L. Nelson, American Potash Institute, West Lafayette, Indiana and</i>	
	<i>Dr. R.D. Munson, American Potash Institute, St. Paul, Minnesota</i>	
	Characteristics of Progressive Farmers	395
	Characteristics of the Industry	396
	Diagnostic Approach	397
	Fertilizer Application	402
	Fall-Winter Application of Fertilizer	413
	Residual or Carry-Over Fertility	418
	Fertility and Efficient Use of Water	423
	Net Response to Fertilizer	425
	Micronutrients	425
	Interactions and Responses	427
	Conclusion	428
	References	429
