Introduction : Fertilizers in a Changing World	1
1. Soil Fertility – Past and Present	5
2. Growth and the Factors affecting It	21
3. Elements Required in Plant Nutrition	71
4. Basic Soil – Plant Relationships	111
5. Soil and Fertilizer Nitrogen	126
6. Soil and Fertilizer Phosphorus	194
7. Soil and Fertilizer Potassium, Magnesium, Calcium, and Sodium	252
8. Sulfur and Microelements in soils and Fertilizers	288
9. Fundamentals of the Manufacture of Nitrogen, Phosphorus, and Potassium Fertilizer materials	357
10. The Manufacture and Properties of Mixed Fertilizers	378
11. Liming	413
12. Soil fertility Evaluation	448
13. Fundamentals of Fertilizer Application	499
14. Cropping Systems and soil Management	554
15. Economics of lime and Fertilizer Use	594
16. Fertilizers and Efficient Use of Water	625
17. Attacking soil Fertility Problems	650
Index	675
