

CONTENTS

1	Introduction	3
2	Water management	3
2.1	A general shortage of water	3
2.2	The collection of water	3
2.3	The storage of water	3
2.4	The transport of water	4
2.5	Irrigation	4
2.6	Land drainage	5
3	Crop intensification	5
3.1	A more profitable environment	5
3.2	Mulching	6
3.3	Direct covers	6
3.4	Low tunnels	7
3.5	Greenhouses	7
3.6	Shaded areas	8
3.7	Windbreaks	8
3.8	Soilless cultivation	9
3.9	Crop protection	9
4	Animal husbandry	10
4.1	Changes call for plastics	10
4.2	Ensilage	10
4.3	Farm buildings	10
4.4	Auxiliary equipment	11
5	Harvesting and crop conservation	11
5.1	Reducing losses	11
5.2	Harvesting	11
5.3	Drying	11
5.4	Handling and transport	12
5.5	Grain storage	12
5.6	Storage of other agricultural produce	12
5.7	Conservation of fresh fruits and vegetables	12

6	Miscellaneous applications	12
6.1	Improved efficiency, lower costs	12
6.2	Agricultural engineering and machinery	13
6.3	Home gardening	13
7	Plastics materials used in agriculture	13
7.1	General considerations	13
7.2	Transparent covering materials	13
7.2.1	Flexible plastic films	13
7.2.2	Rigid plastics sheets	14
7.3	Barrier plastic films	14
7.4	Degradable plastic films	14
7.5	Other Materials	14
7.6	Plastics and phytotoxicity	15
7.7	Plastics and energy	15
7.8	Standards and specifications	15
8	Plastics and Agriculture: a complex but fertile association	16
