The Role of <i>Pseudomonas syringae</i> in the Ecology of the Phyllosphere	1
Microbial Ecology of the Rhizosphere	11
Epiphytic Fitness Determinants in Bacteria	29
Antagonism of Soilborne Plant Pathogens by Rhizosphere <i>Pseudomonads</i>	43
Plant Genes Controlling the Release of Root Exudates	61
Molecular Biology of Pathogenicity in <i>Erwinia chrysanthemi</i> EC16	73
Bacterial Pathogenicity and the Plant's Response : Ultrastructural, Biochemical, and Physiological Perspectives	85
Nuclear Localization Signal in the <i>Agrobacterium tumefaciens</i> VirD2 Border Endonuclease is Essential for Crown Gall Tumorigenesis	107
Genes of <i>Xanthomonas Campestris</i> pv. <i>Vesicatoria</i> That Determine Pathogenicity and Avirulence on Pepper and Tomato	119
Virulence and Pathogenicity of <i>Pseudomonas solanacearum</i> : Genetic and Biochemical Perspectives	127
Genetic Analysis of Syringomycin Production by <i>Pseudomonas syringae</i> pv. <i>Syringae</i>	149
Genetic of Extracellular Polysaccharide Biosynthesis in <i>Erwinia Stewartii</i>	163
Molecular Genetics of a Regulatory System Controlling Extracellular Enzyme Production in the Soft-Rot Bacterium, <i>Erwinia carotovora</i> subsp. <i>Carotovora</i>	175
The <i>lemAgne</i> of <i>Pseudomonas syringae</i> : A Positive Transcriptional Regulator of Lesion Formation Formation and Toxin Production	187
The <i>hrp</i> Genes of <i>Pseudomonas syringae</i> : An Evaluation of Their role in Determining Non-Host Resistance	203
Characterization of <i>avr</i> Genes From <i>Xanthomonas oryzae</i> pv. <i>Oryzae</i>	225
Induction of the Soybean Defense Response by a Cultivar Specific Elicitor	233
Interaction of phytopathogenic <i>Pseudomonads</i> With <i>arabidopsis thaliana</i> as a Model System for Studying Plant-Bacterial Interactions	243
Analysis of Disease Resistance in Bean Using <i>hrp</i> Mutants of <i>Pseudomonas syringae</i>	259
Signal Transduction in the Hypersensitive Response of Tobacco to <i>Pseudomonas syringae</i>	269
Active Oxygen Metabolism During Plant/Bacterial Recognition	275
Varying Membrane Properties of Cells in Tissues Inoculated with HR-Inducing Bacteria	295
Role of Phytoalexins in Resistance of Cotton to Bacterial Blight	303
Bacterial-Induced Resistance to Disease	315
Oversight and Regulation of Biotechnology	327
