BIOLOGICAL MONITORING	
Biological Monitoring for Pesticide Exposure	2
1. Biological Monitoring for Pesticide Dose Determination : Historical Perspectives, Current Practices, and New Approaches	6
2. Ways to Reduce Applicator Exposure to Pesticides	28
3. Estimating Exposure to Pesticides in Epidemiological Studies of Cancer	38
4. Evaluation of Field Worker Exposure to Chlordimeform by Using Urine Monitoring	47
5. Convenient Field Sampling Method for Monitoring Volatile Compounds in Exhaled Breath	56
6. Validation of Environmental Monitoring by Biological Monitoring : Fluorescent Tracer Technique and Path Technique	70
7. Biological Markers to Study Exposure in Animals and Bioavailability of Environmental Contaminants	85
8. Use of Urine for Monitoring Human Exposure to Genotoxic Agents	98
9. Neuropathy Target Esterase in Blood Lymphocytes : Monitoring the Interaction of Organophosphates with a Primary Target	117
PERCUTANEOUS ABSORPTION AFTER PESTICIDE EXPOSURE	
Percutaneous Absorption of Pesticides	126
10. Percutaneous Absorption and Inherent Toxicity	131
11. Dinocap Dermal Absorption in Female Rabbits and Rhesus Monkeys : Implications for Humans	137
12. Percutaneous Absorption in Rhesus Monkeys and Estimation of Human Chemical Exposure	152
13. Percutaneous Absorption : In Vitro Technique as an Alternative to In Vivo Assessments	158
14. Dermal Absorption and Pharmacokinetics of Pesticides in Rats	169
15. Biological Monitoring Techniques for Humans Exposed to Pesticides : Use, Development, and Recommended Refinements	192
16. New Approaches to Analysis of Organophosphate Metabolites in the Urine of Field Workers	206
17. Pilot Study for Biological Monitoring	215
18. Determination of Chlorimeform Residues as 4-Chloro-o-Toluidine in Human Urine Using High-Performance Liquid Chromatography	231
19. Biological Monitoring Technology for Measurement of Applicator Exposure	240
20. Quantitative Determination of Haloxypop in Human Urine by Gas Chromatography – Mass Spectrometry	251
21. Enzyme Immunoassay for Aldicarb	262
RISK ASSESSMENT AND REGULATION	
Exposure Data and the Risk-Assessment Process : Regulatory Considerations	286
22. Mixer – Loader – Applicator Exposure and Percutaneous Absorption Studies Involving EPTC Herbicide : Safety Related to Exposure	288
23. Assessing Risk for Humans on the Basis of Animal Toxicology Data : Use of Dermal Absorption Data for Animal Studies	304
24. Insecticide Absorption from Indoor Surfaces : Hazard Assessment and Regulatory Requirements	315
25. The Environmental Protection Agency's Use of Biological Monitoring Data for the Special Review of Alachlor	327
26. Use of Biological Monitoring Data from Pesticide Users in Making Pesticide Regulatory Decisions in California : Study of Captan Exposure of Strawberry Pickers	338
27. Use of Biological Monitoring in the Regulatory Process	354
28. National Agricultural Chemicals Association Overview on Assessment of Mixer-Loader-Applicator Exposure to Pesticides : Biological Monitoring	368
