Pref	ace		iii
		s to This Volume	v
1.	Corr	elation of Biological Activity with Chemical Structure and Physical Properties	1
	I	Introduction	2
	II	Biological Activity	3
	III	Absorption and Distribution	6
	IV	Structurally Nonspecific Narcotics	16
	V	Chemical-Receptor Interactions	22
	VI	Quantitative aspects of Structure- Activity Investigations	47
		References	57
2.	The	Emulsifier	65
	I	Introduction	65
	II	Classes of Emulsifiers	66
	III	Surface Properties of Emulsifiers	68
	IV	Micelle Formation	71
	V	Hydrophile-Lipophile Balance (HLB) References	74 91
2	TD1		0.2
3.		Stability of Emulsions	93
	I II	Introduction Practical Stability Considerations	93 94
	III	The Oil-Water Interface	94 97
	IV	Cloud Points and Phase Inversion Temperatures	100
	V	Conclusions	100
	•	References	110
4.	Agricultural Formulations with Liquid Fertilizers		113
••	I	Liquid fertilizers—Composition and Use	113
	II	Pesticides	119
	III	Physical Chemistry of Fertilizer Solutions	119
	IV	Recommendations of Combined Uses of Toxicants with Liquid Fertilizers	131
		References	134
5.	Forn	nulation of Pesticidal Dusts, Wettable Powders and Granules	143
	I	Introduction	144
	II	Carriers	145
	III	Dust Concentrates	166
	IV	Field-Strength Dusts	170
	V	Wettable Powder Concentrates	174
	VI	Granular Products	186
	VII	Potential Research Areas	205
		References	206
		Appendix A Appendix B	213 219
6.	Plant for the Formulations of Insecticides		235
	I	Introduction	235
	II	Intake and Handling	236
	III	Formulation Plant	241
	IV	Explosion Hazards	259
	V	Packing	265

	VI	Good Housekeeping	269
7.	Reducing Pesticide Chemical Drift		
	I	Introduction	275
	II	The Basic Drift Parameters	279
	III	Drift Residue Characteristics from Applications of Agricultural Chemicals	316
		References	331
8.	Reducing Pesticide Chemical Drift I Introduction II The Basic Drift Parameters III Drift Residue Characteristics from Applications of Agricultural Chemicals References  Spreading and Retention of Agricultural Sprays on Foliage I Introduction II Factors affecting the Spread of Droplets on Impingement with Solid Surfaces III Factors Affecting Low and Intermediate Volume Spray Cover IV Factors Affecting Retention at High Volume Spray Cover V A Staistical Model for the Build-Up of Deposit by Droplet Coalescence References  Penetration and Translocation of Herbicides I Introduction II Pesticides and Foliar Absorption III Translocation in Plants References	343	
<ul><li>8.</li><li>9.</li><li>10.</li></ul>	I	Introduction	344
	II		346
