

CONTENT

	Page
Preface	ix
1. Grain Production, Preservation, and Trade	1
2. Grain Structure, Composition, and Properties	19
3. Drying-Air Properties	27
4. Grain Equilibrium Moisture Content	67
5. Grain Quality	87
6. Airflow for Drying	125
7. Introductory Analysis of Fixed-Bed Drying Systems	187
8. Theory and Simulation of Grain Drying	205
9. In-Bin Drying	241
10. High-Capacity Grain-Drying Systems	269
11. Rice Drying	309
12. Grain Handling	335
13. Dryer Control Systems	351
14. Grain Storage Management	373
Appendixes	405
A : Conversion of Units – U.S. Customary to S.I.	406
B : Airflow Through Grain	408
C : Maps of Wet-Bulb Temperatures and Depressions	412
D : Physical Properties of Grains and Oilseeds	419
E : Thermal Properties of Grains	427
F : Heating Values of Fuels	430
G : Formulas for Calculating Capacities of Cylindrical Grain Bins	432
H : Grading Standards for Grains	435
Index	443
