Chapter 1	CURRENT STATUS AND HISTORICAL DEVELOPMENT OF RICE CULTURE	1
1.	Environmental Condition for Rice Culture	1
2.	Features of Rice Culture	9
3.	Rice Production Increase since 1955	17
4.	Historical Development of Rice Culture	22
Chapter 2	RICE BREEDING	28
1.	History of Rice Breeding	28
2.	Characteristics of Rice Varieties	34
3.	Outline of Rice Breeding Methods	66
4.	Seed Multiplication System	74
Chapter 3	THEORY OF PLANT GROWTH	77
1.	Life History of Rice Plant	77
2.	Carbon Assimilation and Respiration	91
3.	Inorganic Nutrition	117
4.	Ripening of Rice Plant	139
5.	Physiological Injury	149
6.	Spacing	172
Chapter 4	THEORY AND PRACTICE IN FERTILIZER APPLICATION	183
1.	Some Properties of Paddy Field Soils	193
2.	Amelioration of Poor Paddy Field Soils	194
3.	Characteristics of Major Fertilizer	204
4.	Methods of Fertilizer Application to Paddy Fields	220
Chapter 5	THEORY OF RICE CROP PLANT PROTECTION	228
1.	Weed Control	228
2.	Disease Control	251
3.	Insect Pest Control	270
4.	Prevention of lodging	290
5.	Disaster Damage Control	306
Chapter 6	THEORY AND PRACTICE OF RICE CULTURE	336
1.	Pretreatment of Seeds of Rice	336
2.	Performance of Paddy Rice Seedlings	349
3.	Practice of Growing Seedling	371
4.	Plowing, Puddling, and Transplanting	379
5.	Intertillage	396
6.	Irrigation and Drainage	399
7.	Harvesting	425
Chapter 7	OTHER RICE CULTURAL METHODS	446
1.	Direct-Sowing Rice Culture	446
2.	Lowland and Upland Rotations	456
3.	Early Seasonal Rice Culture	469
4.	High Yielding Cultural Techniques of rice	483
Chapter 8	FUTURE OF RICE CULTURAL TECHNIQUES IN JAPAN	497
