	Page
Chapter 1 Sampling and sample preparation	5
Chapter 2 General directions for chemical analysis of rice tissues	9
Chapter 3 Analysis for total nitrogen (Organic nitrogen) in plant tissues	11
Chapter 4 Procedures for routine analysis of phosphorus, iron, manganese, aluminum, and crude silica in plant tissue	13
Chapter 5 An EDTA method for routine determination of calcium and magnesium in plant tissue and soil solution	19
Chapter 6 Procedures for routine analysis of zinc, copper, manganese, calcium, magnesium, potassium, and sodium by atomic absorption spectrophotometry and flame photometry	23
Chapter 7 Dithizone test for heavy metals in solution	30
Chapter 8 Analysis of boron in plant tissue and water	32
Chapter 9 Determination of chlorine in plant tissue	34
Chapter 10 Determination of chlorophyll in plant tissue	36
Chapter 11 Determination of sugar and starch in plant tissue	38
Chapter 12 Determination of total ^{14}C in plant tissue	42
Chapter 13 Determination of ^{14}C -labelled sugar in plant tissue	45
Chapter 14 Determination of ^{14}C -labelled starch in plant tissue	48
Chapter 15 Assimilation of $^{14}\text{CO}_2$ by intact plants in the field	50
Chapter 16 The safranin-phenol method for detection of silicified cells in rice tissues	52
Chapter 17 Routine procedures for growing rice plants in culture solution	53
Chapter 18 Measurement of light intensity and light transmission ratio	58
Chapter 19 Measurement of leaf area, leaf area index and leaf thickness	59
Chapter 20 Measurement of leaf angle (leaf popenness)	61
