Foreword	v
Acknowledgements	vi
List of tables	xv
List of figures	xvii
List of plates	xviii
Introduction	1
The Tea Plant and its Distribution	2
The Principles of Tea Processing	4
The chemistry of black tea processing	5
Changes during withering	6
Changes during fermentation	6
Changes during drying	12
Changes after drying	12
The Relationship Between Fresh leaf and Made Tea	14
Genetic factors	14
Leaf Characters	15
Chemical Composition of the leaf	15
Environmental factors	16
Effects of climate	17
Effects of soil	19
Cultural factors	19
Plucking	19
Pruning	22
Fertilizing	22
Shading	23
Concluding remarks	24
Handling of green leaf	25
Defects in leaf treatment	25
Damage during and after plucking	25
Damage during transport	25
Damage by heat	25
Concluding remarks	26
Checks on Quality of Leaf	27
Conventional Tea Processing	28
Withering	28
Introduction	28
Mechanism of withering	28
Chemical withering	29
Physical and chemical withering	30
Degree of wither	31
Withering techniques	35
Temperature and humidity of air	36
Factors affecting withering	38
Modifications of withering installations	42
Concluding remarks	43
Future of withering	43
Handling of withered leaf	43
Rolling	44
Introduction	44
Mechanism of rolling	44
Alternative methods of leaf distortion	44

Rollers	45
Heat development	45
Repetitive rolling	46
Period of rolling and number of rolls	46
Continuous rolling	53
Concluding remarks	54
Rolled-leaf sifting and roll-breaking	54
Functions	54
Sieving and sifters	55
Dcapacity	56
Air-conditioning	56
Fermentation	57
Introduction	57
Rate and period of fermentation	57
Temperature	58
Other factors affecting fermentation	59
Fermentation room	61
The assessment of fermentation	62
Arresting fermentation	62
Order of drying	63
Bacterial cleanliness	63
Concluding remarks	64
Drying	64
The technology of tea drying	64
Air temperature	65
Single firing versus double firing	71
Leaf temperature	71
Volume of air	74
Load of leaf	75
Period of drying	75
Tea dryer output	76
Quantity of moisture to be evaporated	76
Output and degree of wither	76
Precautions during drying	78
Air heating equipment	78
Changes during drying	79
Precautions after drying	80
Changes after drying	80
Moisture content	81
Final firing	81
Moisture determination	81
Concluding remarks	82
Grading and sorting	83
Introduction	83
General aspects	83
Sorting	84
Winnowing	85
Greying of teas	86
Moisture absorption during grading	86
Concluding remarks	91
Storage and packing	92
Introduction	92
Storage	92
Packin	93
Palleting	94
Keeping qualities of tea	94
Other factors affecting keeping qualities	97
Concluding remarks	97
Modern tea Processing	98
Introduction	98
Green leaf sorting	98

Development in withering	99
Introduction	99
Modern withering systems	99
Concluding remarks	103
Developments in leaf distortion	104
introduction	105
Unorthodox systems of leaf distortion	105
Other possibilities of leaf distortion	115
Performance of leaf distortion machines	116
Possibilities for unorthodox methods	117
Concluding remark	118
Developments in fermentation	119
Introduction	119
Fermentation systems	120
Concluding remark	122
Ball-breaking	122
Developments in drying	123
Introduction	123
Modern dryers	123
Developments in grading, sorting and packing	124
Factory organization	125
The tea factory of the future	126
New developments and possibilities	127
Kinds of made tea other than black tea	128
Green tea	128
Oolong tea	130
Miscellaneous forms of tea	130
Instant tea	130
Introduction	130
Production of instant teas	131
Processing of instant teas	133
Instant green tea	133
Keeping quality of instant teas	133
Tea bags	133
Tea Tasting	134
Introduction	134
Tea tasting proper	134
Tea tasters' terms	134
Tea tasting procedure	134
Effect of water	135
The milk test	135
Brewing	135
The characteristics of dry leaf	137
Infused leaf	138
Liquoring characteristics	138
Determination of purity	139
Chemical evaluation of tea	142
Micro processing	143
Blending	144
Introduction	144
Blending proper	144
Appendices	
I Tea Research Institutes	147
II Manufacturers	149
III Tea Associations	150
IV Tea Taster's terms	152
References	175
