## CONTENT

Foreword Participants Summary and Recommendations Foreword Pevaluation of the energy value of feeds: overall appreciation Problems of standardization of units to describe the energy value of feedstuffs Application of practical rationing systems Peed evaluation system for the tropics of Latin America A new technique for estimating the ME content of feeds for poultry Sheep as pilot animals Systems of analysis for evaluating fibrous feeds Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems Relationships of conventional and preferred fractions to determined energy values 72
Participants  Summary and Recommendations  Evaluation of the energy value of feeds : overall appreciation  Problems of standardization of units to describe the energy value of feedstuffs  Application of practical rationing systems  Feed evaluation system for the tropics of Latin America  A new technique for estimating the ME content of feeds for poultry  Sheep as pilot animals  Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
Summary and Recommendations 7 Evaluation of the energy value of feeds : overall appreciation 15 Problems of standardization of units to describe the energy value of feedstuffs 25 Application of practical rationing systems 29 Feed evaluation system for the tropics of Latin America 36 A new technique for estimating the ME content of feeds for poultry 38 Sheep as pilot animals 44 Systems of analysis for evaluating fibrous feeds 49 Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems 61
Summary and Recommendations 7 Evaluation of the energy value of feeds : overall appreciation 15 Problems of standardization of units to describe the energy value of feedstuffs 25 Application of practical rationing systems 29 Feed evaluation system for the tropics of Latin America 36 A new technique for estimating the ME content of feeds for poultry 38 Sheep as pilot animals 44 Systems of analysis for evaluating fibrous feeds 49 Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems 61
Problems of standardization of units to describe the energy value of feedstuffs  Application of practical rationing systems  Feed evaluation system for the tropics of Latin America  A new technique for estimating the ME content of feeds for poultry  Sheep as pilot animals  Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
Application of practical rationing systems  Feed evaluation system for the tropics of Latin America  A new technique for estimating the ME content of feeds for poultry  Sheep as pilot animals  Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
Feed evaluation system for the tropics of Latin America  A new technique for estimating the ME content of feeds for poultry  Sheep as pilot animals  Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
A new technique for estimating the ME content of feeds for poultry  Sheep as pilot animals  Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
Sheep as pilot animals  Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
Systems of analysis for evaluating fibrous feeds  Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
Prediction of energy digestibility of forages with in vitro rumen fermentation and fungal enzyme systems  61
