Section I	Animal Agriculture : Its Scope and Future	
	1. The Beginnings of animal domestication	5
	2. Symbiotic relations between plants and animals and the pollution problem	18
	3. Animal foods for human needs	29
	4. Animal agricultural and the population problem	43
Section II	Animal Products	
	5. Meats	57
	6. Milk and milk products	70
	7. Wool and other animal fibers as raw materials for modern use	84
	8. Poultry, eggs, and meat as food	100
	9. Contribution of working animals for power, herding protection and pleasure	113
Section III	Animal Species, Breeds, Strains, and Hybrids	
	10. Dairy Cattle and other dairy animal	131
	11. Cattle used for meat production	147
	12. Swine : plasticity in meeting the needs of man	159
	13. Sheep, goats, and other fiber-producing species	168
	14. Poultry	184
	15. Horses, mules, and asses	201
	16. An Examination of Systems of Management of Wild and domestic animals based on the African ecosystems	218
Section IV	Inheritance and Animal Improvement	
	17. Heredity and How it Works	239
	18. Selection and mating systems	258
	19. Significance of breeds	270
	20. Breeding for milk production	280
	21. Breeding for meat production	292
	22. Improvement of animal fibers through breeding	306
	23. Breeding for eggs and poultry meats	319
	24. Genetic improvement of works and Pleasure animals	334
Section V	Animal Functions and Their Physiological Control	
	25. Regulation of body functions : Hormonal and Nervous control	349
	26. Reproduction in the female	366
	27. Male reproduction and Artificial insemination	383
	28. Egg Laying	394
	29. Lactation	409
	30. Growth and body composition	421
	31. Digestion	435
	32. The environment versus man and his animals	455
	33. Instinctive behavior and Learning	470
Section VI	Animal Nutrition	
	34. General Nutritional Considerations	487
	35. Estimation of the nutritional Value of Feeds	501
	36. Metabolic Conversions	515
	37. Meeting nutrient requirements for physiological activities	532

Section VII	Livestock Management	
	38. Management of Beef Cattle	549
	39. Management of Dairy Cattle and other milk-producing animals	563
	40. The science and husbandry of Swine management	579
	41. Management of sheep and other fiber-producing animals	593
	42. Horse management	611
	43. Poultry management	622
	44. Management and disease	637
Section VIII	Classification, Grading, and Marketing of Livestock and Their Products	
	45. Classification, Grading, and Marketing of livestock and Meat	659
	46. The production, marketing, and classification of wool and other animal fibers	686
	47. Grading and marketing of milk	762
	48. Processing and marketing of poultry and eggs	716
	49. World marketing and distribution of animal products	734
