Part I

Milk

Chapter 1	Milk: Main Characteristics	3
1.1	Composition and Structure.....	3
1.1.1	Principal Components	3
1.1.2	Structural Elements	4
1.2	Milk Formation.....	7
1.3	Some Properties of Milk	11
1.4	Variability	12
1.5	Changes.....	13
	Suggested Literature	16
Chapter 2	Milk Components.....	17
2.1	Lactose.....	17
2.1.1	Chemical Properties.....	17
2.1.2	Nutritional Aspects	19
2.1.3	Physicochemical Aspects.....	20
2.2	Salts.....	26
2.2.1	Composition and Distribution among the Phases.....	26
2.2.2	Properties of the Salt Solution	30
2.2.3	Colloidal Calcium Phosphate	32
2.2.4	Nutritional Aspects	33
2.2.5	Changes in Salts	33
2.3	Lipids	37
2.3.1	Constituent Fatty Acids	38
2.3.2	Lipid Classes	42
2.3.3	Nutritional Aspects	47
2.3.4	Autoxidation	48
2.3.5	Triglyceride Crystallization	52
2.4	Proteins	63
2.4.1	Chemistry of Proteins.....	63
2.4.2	Survey of Milk Proteins	72
2.4.3	Serum Proteins.....	76
2.4.4	Casein	79
2.4.5	Nutritional Aspects	83

2.5	Enzymes.....	84
2.5.1	Enzyme Activity	85
2.5.2	Some Milk Enzymes	88
2.5.3	Inactivation	92
2.6	Other Components.....	93
2.6.1	Natural Components.....	93
2.6.2	Contaminants	95
2.6.3	Radionuclides	97
2.7	Variability	98
2.7.1	Sources of Variability	98
2.7.2	Nature of the Variation.....	103
2.7.3	Some Important Variables	106
	Suggested Literature	108
Chapter 3 Colloidal Particles of Milk.....		109
3.1	Basic Aspects.....	109
3.1.1	Surface Phenomena	111
3.1.2	Colloidal Interactions	118
3.1.3	Aggregation	122
3.1.4	Size Distributions	125
3.2	Fat Globules.....	127
3.2.1	Properties	127
3.2.2	Emulsion Stability	130
3.2.3	Interactions with Air Bubbles	134
3.2.4	Creaming.....	136
3.2.5	Lipolysis	139
3.3	Casein Micelles	140
3.3.1	Description.....	141
3.3.2	Changes.....	145
3.3.3	Colloidal Stability.....	150
3.3.4	Gel Formation and Properties	155
	Suggested Literature	157
Chapter 4 Milk Properties.....		159
4.1	Solution Properties	159
4.2	Acidity	160
4.3	Redox Potential	162
4.4	Flavor.....	164
4.5	Density.....	166
4.6	Optical Properties	167
4.7	Viscosity	169
4.7.1	Some Fluid Rheology.....	169
4.7.2	Liquid Milk Products	173
	Suggested Literature	174

Chapter 5	Microbiology of Milk	175
5.1	General Aspects	175
5.1.1	Microorganisms	175
5.1.2	Bacteria	176
5.1.3	Yeasts and Molds.....	179
5.1.4	Enumeration of Microorganisms.....	181
5.1.5	Growth	182
5.1.6	Milk as a Substrate for Microorganisms	187
5.2	Undesirable Microorganisms.....	190
5.2.1	Pathogenic Microorganisms	190
5.2.2	Spoilage Microorganisms	194
5.3	Sources of Contamination	197
5.3.1	Microbial Ecology	197
5.3.2	Microorganisms Present in the Udder ...	198
5.3.3	Contamination during and after Milking	199
5.4	Hygienic Measures	201
5.4.1	Protection of the Consumer against Pathogenic Microorganisms	202
5.4.2	Measures against Spoilage Organisms....	202
	Suggested Literature	203

Part II

Processes

Chapter 6	General Aspects of Processing.	207
6.1	Introduction.....	207
6.2	Preservation Methods	209
6.3	Quality Assurance.....	212
6.3.1	Concepts	212
6.3.2	Hazard Analysis/Critical Control Points (HACCP)	214
6.3.3	Quality Assurance of Raw Milk	215
6.4	Milk Storage and Transport	217
6.4.1	Milk Collection and Reception	217
6.4.2	Milk Storage	218
6.4.3	Transport of Milk in the Dairy	221
6.5	Standardizing	222
	Suggested Literature	223
Chapter 7	Heat Treatment.	225
7.1	Objectives	225
7.2	Changes Caused by Heating	226

7.2.1	Overview of Changes	226
7.2.2	Reactions of Proteins.....	229
7.2.3	Reactions of Lactose	233
7.2.4	Heat Coagulation	236
7.3	Heating Intensity	242
7.3.1	Processes of Different Intensity	242
7.3.2	Kinetic Aspects.....	245
7.3.3	Inactivation of Enzymes.....	252
7.3.4	Thermobacteriology.....	255
7.4	Methods of Heating.....	263
7.4.1	Considerations	263
7.4.2	Equipment.....	265
7.4.3	Heat Regeneration	270
7.4.4	Control	271
	Suggested Literature	272
Chapter 8	Centrifugation.....	273
8.1	Cream Separation	273
8.2	Removal of Particles	276
	Suggested Literature	277
Chapter 9	Homogenization	279
9.1	Objectives	279
9.2	Operation of the Homogenizer.....	280
9.3	Effects of Turbulence	282
9.4	Factors Affecting Fat Globule Size.....	285
9.5	Surface Layers	287
9.6	Colloidal Stability.....	289
9.7	Homogenization Clusters	290
9.8	Creaming.....	292
9.9	Other Effects of Homogenization	293
9.10	Other Ways of Working.....	295
	Suggested Literature	296
Chapter 10	Concentration Processes.....	297
10.1	General Aspects.....	297
10.1.1	Concentration of Solutes	297
10.1.2	Water Activity.....	300
10.1.3	Changes Caused by Concentrating	302
10.1.4	The Glassy State.....	303
10.1.5	Reaction Rates.....	304
10.2	Evaporating.....	307

10.3	Drying: General Aspects	314
10.3.1	Objectives	314
10.3.2	Drying Methods.....	316
10.4	Spray Drying	318
10.4.1	Drier Configuration	318
10.4.2	Atomization	319
10.4.3	Change of State of the Drying Air.....	322
10.4.4	Changes of State of the Drying Droplets	326
10.4.5	Two-Stage Drying.....	332
	Suggested Literature	335
Chapter 11	Cooling and Freezing	337
11.1	Cooling	337
11.2	Freezing	338
	Suggested Literature	340
Chapter 12	Membrane Processes	341
12.1	General Aspects	341
12.1.1	Types of Processes	341
12.1.2	Efficiency	343
12.1.3	Technical Operation.....	345
12.2	Ultrafiltration	346
12.2.1	Composition of the Retentate.....	346
12.2.2	Permeate Flux.....	349
12.3	Reverse Osmosis.....	351
12.4	Desalting.....	354
	Suggested Literature	356
Chapter 13	Lactic Fermentations	357
13.1	Lactic Acid Bacteria.....	357
13.1.1	Taxonomy	357
13.1.2	Metabolism	360
13.1.3	Genetics	373
13.1.4	Bacteriocins	374
13.2	Acid Production.....	374
13.3	Bacteriophages.....	377
13.3.1	Phage Composition and Structure.....	377
13.3.2	Phage Multiplication	377
13.3.3	Phage Resistance Mechanisms.....	382
13.3.4	Inactivation	383
13.4	Ecological Aspects.....	384
13.5	Starters	385

Chapter 17	Cream Products447
17.1	Sterilized Cream447
17.1.1	Manufacture448
17.1.2	Heat Stability448
17.1.3	Stability in Coffee448
17.1.4	Clustering.....	.450
17.2	Whipping Cream452
17.2.1	Desirable Properties.....	.452
17.2.2	Manufacture453
17.2.3	The Whipping Process454
17.3	Ice Cream.....	.458
17.3.1	Manufacture.....	.459
17.3.2	Physical Structure: Formation and Stability462
17.3.3	Role of the Various Components465
	Suggested Literature466
Chapter 18	Butter467
18.1	Description.....	.467
18.2	Manufacture468
18.2.1	Processing Scheme468
18.2.2	The Churning Process471
18.2.3	Working474
18.3	Properties478
18.3.1	Microstructure.....	.478
18.3.2	Consistency480
18.3.3	Cold Storage Defects.....	.485
18.4	Cultured Butter from Sweet Cream486
18.5	High-Fat Products.....	.489
18.5.1	Anhydrous Milk Fat489
18.5.2	Modification of Milk Fat.....	.490
18.5.3	Recombined Butter.....	.492
18.5.4	Low-Fat Butter Products494
	Suggested Literature495
Chapter 19	Concentrated Milks497
19.1	Evaporated Milk497
19.1.1	Manufacture497
19.1.2	Product Properties501
19.1.3	Heat Stability502
19.1.4	Creaming.....	.504
19.1.5	Age Thickening and Gelation505
19.2	Sweetened Condensed Milk.....	.507

19.2.1	Manufacture507
19.2.2	Keeping Quality509
	Suggested Literature512
Chapter 20	Milk Powder513
20.1	Objectives513
20.2	Manufacture514
20.3	Hygienic Aspects517
20.3.1	Bacteria in the Original Milk517
20.3.2	Growth during Manufacture..519
20.3.3	Incidental Contamination521
20.3.4	Sampling and Checking521
20.4	Powder Characteristics522
20.4.1	The Particle.....522
20.4.2	Extractable Fat.....522
20.4.3	Free-Flowingness.....523
20.4.4	Specific Volume525
20.4.5	Dissolution.....526
20.4.6	WPN Index529
20.4.7	Flavor530
20.4.8	Conclusions.....531
20.5	Deterioration531
20.6	Other Types of Milk Powder.....535
	Suggested Literature	535
Chapter 21	Protein Preparations537
21.1	Manufacture538
21.1.1	Casein539
21.1.2	Whey Protein540
21.1.3	Other Products542
21.2	Functional Properties.....	..543
21.2.1	Solution Properties544
21.2.2	Gels546
21.2.3	Emulsions548
21.2.4	Foams.....	..549
	Suggested Literature550
Chapter 22	Fermented Milks551
22.1	General Aspects551
22.2	Types of Fermented Milks552
22.2.1	Mesophilic Fermentation....	..552
22.2.2	Thermophilic Fermentation553

22.2.3	Yeast–Lactic Fermentation555
22.2.4	Molds in Lactic Fermentation557
22.3	Cultured Buttermilk.....	.557
22.4	Yogurt558
22.4.1	The Yogurt Bacteria.....	.559
22.4.2	Manufacture562
22.4.3	Physical Properties565
22.4.4	Flavor Defects and Shelf Life568
22.5	Nutritional Aspects569
22.5.1	Composition.....	.569
22.5.2	Nutritional Value.....	.570
22.5.3	Probiotics571
22.5.4	Prebiotics572
	Suggested Literature573

Part IV

Cheese

Chapter 23	Principles of Cheese Making577
23.1	Introduction.....	.577
23.2	Essential Process Steps579
23.3	Changes Occurring580
	Suggested Literature582
Chapter 24	Cheese Manufacture583
24.1	Milk Properties and Pretreatment583
24.1.1	The Raw Milk.....	.583
24.1.2	Milk Treatment584
24.2	Starters586
24.3	Enzyme-Induced Clotting.....	.588
24.3.1	Enzymes Used588
24.3.2	The Enzyme-Catalyzed Reaction590
24.3.3	Aggregation591
24.3.4	Gel Formation.....	.593
24.3.5	The Renneting Time594
24.3.6	Clotting of Heat-Treated Milk596
24.4	Curd Making.....	.596
24.4.1	Clotting597
24.4.2	Accumulation of Various Components600
24.4.3	Concentrating before Clotting.....	.601
24.4.4	Syneresis603
24.4.5	Acid Production and Washing.....	.608
24.4.6	Separation of Curd and Whey.....	.610

24.5	Shaping and Pressing	613
24.6	Salting	615
24.6.1	Mass Transport during Salting	616
24.6.2	Important Variables	622
24.6.3	Distribution of Salt and Water after Salting	624
24.7	Curing, Storage, and Handling	625
24.7.1	Temperature	626
24.7.2	Air Conditions	627
24.7.3	Rind Treatment	627
24.7.4	Packaging	630
24.8	Cheese Composition and Yield	631
24.8.1	Variables Involved	632
24.8.2	Yield	636
24.8.3	Standardizing the Milk	638
	Suggested Literature	638

Chapter 25 Cheese Ripening and Properties 641

25.1	Lactic Fermentation	641
25.2	Enzyme Sources	642
25.3	Proteolysis	644
25.3.1	Methods of Characterization	644
25.3.2	Milk Proteinases	645
25.3.3	Clotting Enzymes	646
25.3.4	Enzymes of Lactic Acid Bacteria	648
25.3.5	Enzymes of Nonstarter Organisms	650
25.3.6	Interaction between Enzyme Systems	650
25.3.7	Ultrafiltration of Cheese Milk	651
25.4	Lipolysis	653
25.5	Development of Flavor	654
25.5.1	Description	654
25.5.2	Formation of Flavor Compounds	655
25.6	Development of Texture	659
25.6.1	Structure	659
25.6.2	Consistency	661
25.7	Accelerated Ripening	669
25.8	Nutritive Value and Safety	672
	Suggested Literature	675

Chapter 26 Microbial Defects 677

26.1	Coliform Bacteria	679
26.2	Butyric Acid Bacteria	680
26.3	<i>Lactobacilli</i>	683
26.4	Heat-Resistant <i>Streptococci</i>	684

26.5	Propionic Acid Bacteria	684
26.6	Organisms on the Rind.....	685
26.7	Other Aspects.....	686
	Suggested Literature	686
Chapter 27	Cheese Varieties	687
27.1	Overview.....	687
27.1.1	Variations in Manufacture	688
27.1.2	Types of Cheese	694
27.2	Fresh Cheese.....	696
27.2.1	Quarg	697
27.2.2	Cottage Cheese	699
27.3	Gouda-Type Cheeses	702
27.3.1	Manufacture	702
27.3.2	Properties and Defects.....	709
27.4	Cheddar-Type Cheeses	712
27.4.1	Manufacture	712
27.4.2	Properties	716
27.5	Swiss and Pasta-Filata Types	718
27.5.1	Emmentaler.....	719
27.5.2	Mozzarella	722
27.6	Cheeses with a Specific Flora.....	724
27.6.1	Soft Cheese with Surface Flora	725
27.6.2	Blue-Veined Cheese.....	734
27.7	Processed Cheese.....	737
	Suggested Literature	739

Part V

Appendix and Index

Appendix A.1	Often-Used Symbols	743
A.2	Abbreviations.....	745
A.3	Conversion Factors	746
A.4	Physical Properties of Milk Fat	747
A.5	Amino Acid Composition of Milk Proteins	748
A.6	Amino Acid Sequences of Caseins.....	750

Some Properties	Lactose	754
Fine Filaments	Cow Milk	
Physical Properties of Milk	Milk Products	
Mass Density	Viscosity	Some Milk
Fractions		757
Heat Transfer		
Data	Some Cheese Varieties	

Index
