

## CONTENTS

<i>Preface</i>	<i>vii</i>
<i>A note on using the book</i>	<i>ix</i>
<i>Acknowledgements</i>	<i>x</i>
<b>1 Introduction</b>	<b>1</b>
1.1 The nature of milk	1
1.2 Milk production as an activity of man	1
1.3 Biosynthesis of milk	6
1.4 The composition of milk	8
1.5 The flavour and sensory properties of milk	27
1.6 Potential hazardous substances in milk	28
1.7 The microbiology of milk at farm level	33
<b>2 Liquid milk and liquid milk products</b>	<b>42</b>
2.1 Introduction	42
2.2 Technology	46
2.3 Chemistry	76
2.4 Microbiology	88
<b>3 Concentrated and dried milk products</b>	<b>103</b>
3.1 Introduction	103
3.2 Technology	104
3.3 Chemistry	138
3.4 Microbiology	149
<b>4 Dairy protein products</b>	<b>159</b>
4.1 Introduction	159
4.2 Technology	162
4.3 Chemistry	179
4.4 Microbiology	180
<b>5 Cream and cream-based products</b>	<b>183</b>
5.1 Introduction	183
5.2 Technology	183
5.3 Chemistry	211
5.4 Microbiology	216

<b>6</b>	<b>Butter, margarine and spreads</b>	<b>224</b>
6.1	Introduction	224
6.2	Technology	227
6.3	Chemistry	257
6.4	Microbiology	268
<b>7</b>	<b>Cheese</b>	<b>275</b>
7.1	Introduction	275
7.2	Technology	276
7.3	Chemistry	321
7.4	Microbiology	332
<b>8</b>	<b>Fermented milks</b>	<b>346</b>
8.1	Introduction	346
8.2	Technology	347
8.3	Chemistry	370
8.4	Microbiology	380
<b>9</b>	<b>Ice cream and related products</b>	<b>387</b>
9.1	Introduction	387
9.2	Technology	391
9.3	Chemistry	420
9.4	Microbiology	426
	<i>Bibliography</i>	432
	<i>Index</i>	436
