Preface to the fourth edition	page v
Note from the compilers	ix
Acknowledgements	x
Metric equivalents	xii

General Introduction

Method of preparing the fourth edition	2
Examination of existing values	2
Selection of new foods for inclusion	2
Choice of nutrients to be covered	2
Selection of values from the literature	3
Analysis	4

Arrangement of the tables	4
General features of the fourth edition	4
Conventions and symbols used in the tables	5
Food code number	6
Description and number of samples	6

Modes of expression and determination of constituents	7
Proximate constituents	7
<i>Water, total nitrogen, protein, fat, carbohydrates, dietary fibre, alcohol</i>	
Energy value	9
Inorganic constituents	10
<i>Na K Ca Mg P Fe Cu Zn S Cl</i>	
Vitamins	12
<i>Vitamin A : retinol and carotene ; vitamin D ; thiamin ; riboflavin ; nicotinic acid ; vitamin C ; vitamin E (tocopherols) ; vitamin B₆ ; vitamin B₁₂ ; folic acid ; pantothenic acid ; biotin</i>	
Amino acids	14
Fatty acids	15

Notes on food groups	18
----------------------	----

The composition of cooked dishes	29
----------------------------------	----

Using the tables	30
------------------	----

References to text	35
--------------------	----

Contents *continued*

The tables	Order of food groups covered in the tables
	Cereals and cereal products
	Milk and milk products
	Eggs
	Fats and oils
	Meat and meat products
	Fish and fish products
	Vegetables
	Fruit
	Nuts
	Sugars, preserves and confectionery
	Beverages
	Alcoholic beverages
	Sauces, soups and miscellaneous foods
	Section 1
	Description of foods, proximate composition, energy value, inorganic constituents and vitamins (per 100g) 37
	Section 2
	Amino acid composition (mg per g nitrogen) 279
	Section 3
	Fatty acid composition (g per 100g fatty acids) 289
	Section 4
	Subsidiary data : cholesterol, phytic acid, iodine, organic acids 301
Appendices	1 Details of analytical procedures 313
	2 Note on the calculation of the energy value of foods and diets 322
	3 Systematic names for fish and plant foods 330
	4 Recipes for cooked dishes 334
	5 Key to the use of amino acid and fatty acid numbers 347
	6 Key to references and sources of data 374
References	to tables sections 1–4 392
Index	of foods 407
