

CONTENTS

	PAGE
INTRODUCTION	xiii
I. GENERAL ASPECTS OF SUPPLY AND DEMAND	
World Protein Supplies and Needs	3
Economics of Protein Production	20
Nutrition Policy with Regard to Protein	32
Complementary Ways of Meeting the World's Protein Needs	46
II. GENERAL ASPECTS OF PROTEIN PRESERVATION AND PROCESSING	
Toxic Agents and Protein Availability	65
Microbial Spoilage of Proteinaceous Foods	89
Characteristics of Preservation Processes as applied to Proteinaceous Foods	107
Alterations to Proteins during Processing and the Formation of Structures	126
III. PROTEINS FROM ANIMAL SOURCES	
Quantitative and Qualitative Control of Proteins in Meat Animals	141
Properties of Meat Proteins	167
Intrinsic and Extrinsic Factors Affecting the Quality of Fish	186
Properties of Fish Proteins	200
Milk and Milk Products	213
Eggs and Poultry	225
IV. PROTEINS FROM PLANT SOURCES	
Control of Plant Proteins: The Influence of Genetics and Ecology of Plant Foods	245
Enrichment of Plant Protein	266
Structural and Nutritional Properties of Cereal Proteins	280
Baking: the Significance of Modern Processing Methods	300
V. UNCONVENTIONAL PROTEIN SOURCES	
Hydrocarbon-Grown Yeasts in Nutrition	317
Algal Proteins and the Human Diet	328
Soya Protein Isolates for Food	346

VI. PRESENTATION

The Organoleptic Qualities of Protein Foods (with Special Reference to Cooking Procedures)	365
Protein Problems of Large Scale Catering	388

VII. ASSIMILATION

Regulatory Mechanisms in Mammalian Protein Metabolism	403
Effects of Disproportionate Amounts of Amino Acids	417
Procedures of Protein Evaluation	448
Abnormalities of Protein Metabolism	458
CONCLUDING REMARKS	474
LIST OF REGISTRANTS	479
AUTHOR INDEX	487
SUBJECT INDEX	505
