PREFACE	xi
1 Modern Methods of Analysis of Corn Derived Sweeteners	1
2 Corn Syrup Selections in Food Applications	12
3 Taste Receptor Origin of Sweetness	25
4 Fructose-A Regulatory Perspective	37
5 Polyols: Chemistry and Application	49
6 Sucrose and Health	62
7 Lactose and the Sugars of Honey and Maple: Reactions, Properties, and Analysis	74
8 Sugar Dehydration Reactions	113
9 The Influence of Food Carbohydrates On Dental Caries	134
10 Carbohydrates, Sweet Taste, and Obesity: Changing Consumption Patterns and Health Implications	153
11 Health Implications of Food Carbohydrates: Heart Disease and Diabetes	170
12 Lectins: Carbohydrate-Binding Proteins in Search of a Function	206
13 Current Concepts of Starch Structure	217
14 Starch Derivatives and Their Use in Foods	237
15 Food Applications of Gums	270
16 Dietary Fiber in Health and Disease	296
17 Dietary Fiber Analysis-Concepts and Problems	312
18 Effect of Preparative Procedure on the Evaluation of in Vitro Indigestible Residue (Dietary Fiber)	333
19 Analysis of Polysaccharides	356
20 Protein-Polysaccharide Interactions	375
21 Hydrocolloid Interactions with Starches	399
22 Polysaccharide Conformation in Solutions and Gels	420
23 Metabolism and Mutagenic Effects of Maillard Reaction Products	458
INDEX	483
