

CONTENTS

Section I FUNDAMENTALS OF NUTRITION

1 Why We Eat	3
2 What We Eat	14
3 Why We Eat What We Eat	43

Section II How THE BODY USES FOOD

4 From Mouth to Cell	61
5 Energy Release and Biological Syntheses	77
6 Integrated Nutrient Functions in Body Systems	95
7 Maintaining Body Fluids	112

Section III ADJUSTING DIETS TO INDIVIDUAL LIFESTYLES

8 Food Selection Guides	127
9 Adjusting Diet to Body Weight and Activity	145
10 Snacking and Eating Out	166
11 Stretching the Food Budget	180
12 Diet and Personal Priorities	201

Section IV NUTRITION THROUGH THE LIFESPAN

13 Identifying Nutrition Problems	237
14 From Single Cell to Baby	256
15 Feeding Mother and Baby	269
16 The Formative Years	285
17 A Changing Body	294
18 Appropriate Diets for Men and Women	313
19 Maximizing the Senior Years	327

Section V DIET AND HEALTH

20 Foodborne Illnesses	341
21 Resistance	359
22 Anemias	368
23 Gastrointestinal Disorders	376
24 Fiber and Health	381
25 Conditions Associated with Circulatory Problems	390
26 Protein-Calorie Malnutrition (PCM)	407
27 Micronutrient-Deficiency Diseases	417
28 Oral Diseases	431

Section VI THE FUTURE OF NUTRITION	
29 Expanding Nutrition Knowledge	441
30 Horizons of Nutrition	451
Appendix	467
Index	499
