

TABLE OF CONTENTS

CHAPTER	PAGE
I. GENERAL INTRODUCTION	1
II. CARBOHYDRATES	12
III. FATS AND LIPOIDS: LIPIDS (LIPINS)	28
IV. GENERAL CHEMISTRY OF THE PROTEINS AND THEIR AMINO ACIDS	50
V. NUTRITIONAL CHEMISTRY OF THE PROTEINS AND THEIR AMINO ACIDS	71
VI. ENZYMES AND DIGESTION	91
VII. THE FATE OF THE FOODSTUFFS IN METABOLISM	118
VIII. THE FUEL VALUE OF FOOD AND THE ENERGY REQUIREMENT OF THE BODY	139
IX. THE BASAL ENERGY METABOLISM, REGULATION OF TEMPERATURE, AND SPECIFIC DYNAMIC ACTION	169
X. TOTAL ENERGY METABOLISM AND FOOD REQUIREMENT	201
XI. QUANTITATIVE ASPECTS OF PROTEIN NEEDS AND VALUES	215
XII. MINERAL ELEMENTS IN FOODS AND NUTRITION	242
XIII. NUTRITIONAL ASPECTS OF ACID-BASE BALANCE	262
XIV. QUANTITATIVE ASPECTS OF CALCIUM AND PHOSPHORUS NEEDS AND VALUES	277
XV. IRON AND COPPER IN FOOD AND NUTRITION	306
XVI. IODINE IN NUTRITION: SIMPLE GOITER AS A NUTRITIONAL PROBLEM	335
XVII. VITAMIN A AND ITS PRECURSORS	350
XVIII. VITAMIN B (B1)	385
XIX. VITAMIN G OR THE FLAVIN FACTOR IN NUTRITION AND FOOD VALUES	406
XX. VITAMIN C (ASCORBIC ACID, CEVITAMIC ACID)	423
XXI. VITAMIN D	446
XXII. VITAMIN E, REPRODUCTION, AND LACTATION	468
XXIII. SOME CHEMICAL ASPECTS OF GROWTH AND DEVELOPMENT	483
XXIV. DIETARY STANDARDS, THE DIFFERING RATIOS OF ADEQUATE TO OPTIMAL INTAKE, AND THE PRINCIPLE OF NATURAL WHOLES	504
XXV. THE PROBLEM OF THE BEST USE OF FOOD	527
XXVI. FOOD ECONOMICS IN THE LIGHT OF THE NEWER CHEMISTRY OF NUTRITION	547
XXVII. FOOD CHEMISTRY AND HUMAN PROGRESS	561

APPENDICES

A. FACTORS FOR CALORIFIC VALUES OF VARIOUS MATERIALS WHEN BURNED IN OXY-CALORIMETER	577
B. COMPOSITION OF FOODS	579
B. FOODS AS SOURCES OF VITAMINS A, B, C, AND G	597
C. SIMPLE STATISTICAL TREATMENT OF THE DATA OF NUTRITION INVESTIGATIONS	602
INDEX	609
