

Contents

Introduction	1
<i>Chapter 1</i>	
History of Wine	11
1.1 The Prehistory of Wine	11
1.2 Dissemination of Viticulture	15
1.3 The Earliest Chemical Evidence for Ancient Wine	16
1.4 The Holy Land	21
1.5 Egypt	23
1.6 Greece	27
1.7 Romans	33
1.7.1 Resinated Wine	42
1.8 Post-Roman Europe	43
1.9 The New World	50
References	62
<i>Chapter 2</i>	
The Vine	65
2.1 The Origin, Taxonomy and Biogeography of the Grapevine	65
2.1.1 Prehistoric Evidence for <i>Vitis</i>	71
2.1.2 Differences between Muscadine Grapes and <i>Euvitis</i> spp.	74
2.2 The Grape and Maturation Processes	78
2.2.1 Berry Structure	79
2.2.2 Developmental Stages of the Grape	85

2.2.3	Flavour and Aroma Compounds in the Mature Grape	92
2.2.4	Grape-Derived Phenolic Substances	101
	References	112

Chapter 3

The Yeast and Fermentation 114

3.1	The Yeast	114
3.1.1	Taxonomy	115
3.1.2	Cell Structure	117
3.2	Fermentation	132
3.3	Yeast Starter Cultures	156
3.3.1	Bourgovin	157
3.3.2	EC-1118	157
	References	158

Chapter 4

Winemaking Processes 161

4.1	Red Wine Production	161
4.1.1	Time of Harvest	162
4.1.2	Harvesting	164
4.1.3	Crushing	166
4.1.4	Fermentation	167
4.2	White Wine Production	170
4.2.1	White Wine Styles	171
4.2.2	Harvesting	172
4.2.3	Crushing	173
4.2.4	Pressing	173
4.2.5	Settling/Clarification	174
4.2.6	Fermentation	174
4.3	Sparkling Wine	174
4.3.1	The Champagne Method	176
4.3.2	The Tank Method	182
4.3.3	The Transfer Method	184
4.3.4	Carbonation	185
4.4	Cold Maceration	187
4.5	Carbonic Maceration	187

4.6	Thermovinification	191
4.7	Chaptalisation	192
4.8	Use of Commercial Enzymes in Winemaking	193
	References	201

Chapter 5

Lactic Acid Bacteria and Malo-Lactic Fermentation **203**

5.1	Lactic Acid Bacteria	203
5.2	Malo-Lactic Fermentation	223
5.2.1	Urethane (Ethyl Carbamate), and Arginine Metabolism	231
5.2.2	Bacteriophages	237
	References	238

Chapter 6

Clarification, Stabilisation and Preservation **242**

6.1	Clarification	242
6.1.1	Proteins	246
6.1.2	Polyvinyl Polypyrrolidone	253
6.1.3	Bentonite	255
6.2	Tartaric Acid, Tartrates and Wine Stability	258
6.2.1	Static Cold Stabilisation	264
6.2.2	Contact Cold Stabilisation	264
6.2.3	Ion-Exchange Stabilisation	266
6.2.4	Estimation of Cold Stability	267
6.2.5	Prevention of Crystallisation	269
6.2.6	Protein Instability	271
6.2.7	Assessment of Heat (Protein) Stability	273
6.3	Preservation	274
6.3.1	Sulfur Dioxide	274
6.3.2	Dimethyldicarbonate	286
6.3.3	Sorbic Acid	287
6.3.4	Benzoic Acid	289
	References	290

<i>Chapter 7</i>	
Maturation and Ageing	293
7.1 <i>Sur Lie</i> Storage of Wine	296
7.2 Oak and Wine	298
7.3 Maturation Reactions in Red Wine	302
7.4 Micro-Oxygenation (MOx)	303
7.5 Corks	306
References	307
<i>Chapter 8</i>	
Fortified Wines	309
8.1 Fortification	312
8.2 Port	313
8.3 Vins Doux Naturels (VDN)	328
8.4 Madeira	329
8.5 Sherry	332
8.6 Commandaria	346
References	348
<i>Chapter 9</i>	
Other Organisms Important in Oenology	351
9.1 Killer Yeasts	351
9.2 <i>Brettanomyces</i>	362
9.3 <i>Botrytis cinerea</i>	367
References	382
<i>Chapter 10</i>	
Pests and Diseases	386
10.1 Phylloxera	386
10.2 Fungal Diseases of the Grapevine	399
10.2.1 Downy Mildew	399
10.2.2 Powdery Mildew	401
10.2.3 Black Rot	403
10.2.4 Dead-Arm	405
10.2.5 Anthracnose	411
10.3 Bacterial Diseases of the Grapevine	413

10.3.1	Pierce's Disease	413
10.3.2	Crown Gall	415
10.4	Viruses	431
10.4.1	Fanleaf Degeneration	432
10.4.2	Grapevine Leafroll	433
	References	434
 <i>Appendix A</i>		
	Table of Wine Composition	437
 <i>Appendix B</i>		
	Density Scales	441
	 Subject Index	 443
