

CONTENTS

1	SOME BASIC CONCEPTS OF HEAT TRNSFER	1
1.1	Forms of Heat Transfer	1
1.2	Related Physical Characteristics	2
	Dimensional Characteristics	2
	Density	2
	Fluid Viscosity	3
	Unit surface Conductance	4
	Latent Heat	4
	Specific Heat	5
	Thermal Conductivity	5
	Thermal Diffusivity	6
	Thermal Emissivity	6
	Mass Diffusivity or Diffusion Coefficient	7
	Mass Transfer Coefficient	7
	Coefficient of Thermal Expansion	8
	Dimensionless Parameters	8
1.3	Newtonian Law of Heating and Cooling	9
	Cooling Rate	10
	Half-Cooling Time	12
1.4	Fourier's Law of Heating and Cooling	14
1.5	Criterion for Choice of Method of Solution of Heat Transfer Problems	17
1.6	Mass-Average Temperature	19
1.7	Heat of Adsorption and Heat of Wetting	23
2	SPECIFICHEAT	25
2.1	Energy Equation	25
2.2	Measurement of Specific Heat	26
	Sieble's Equations	26
	Method of Mixtures	28
	Correction of Thermal Leakage	30
	Method of Guarded-Plate	30
	Method of Comparison Calorimeter	31
	Method of Calculated Specific Heat	33
	Adiabatic Agricultural Calorimeter	34
	Method of Differential Scanning Calorimetry (DSC)	37

2.3	Specific Heat of Foods and Agricultural Materials	39
	Grains and Seeds	39
	Forage Products	49
	Fruits, Vegetables, and Nuts	50
	Tobacco	56
	Wood and Tree Bark	62
	Soils	66
2.4	Specific Heat of Processed Food Materials	67
	Baked Products	67
	Frozen Foods	71
	Dehydrated Foods	76
	Oils and Butter	77
	Fluid Foods	79
2.5	Latent Heat of Fusion	80
3	DETERMINATION OF THERMAL CONDUCTIVITY THERMAL DIFFUSIVITY, AND UNIT SURFACE CONDUCTANCE	83
3.1	Thermal Conductivity and Thermal Diffusivity	83
	Effect of Temperature	85
	Effect of Moisture	85
3.2	Measurement of Thermal Conductivity	86
	Steady-State Longitudinal Heat Flow Method	87
	Steady-State Radial Heat Flow Methods	87
	Steady-State Heat of Vaporization Method	88
	Unsteady-State Methods	89
	Thermal Conductivity Probe Method	94
3.3	Measurement of Thermal Diffusivity	104
	Use of Thermal Conductivity Probe	105
	Cylindrical Object and Time-Temperature Data	107
	Spherical Object and Time-Temperature Data	109
	Use of Charts and Graphical Solution	110
3.4	Evaluation of Unit Surface Conductance	112
	Interference Method	114
	Empirical Equations method	115
	Geometric Analysis Method	117
	Similitude Method	120

4 THERMAL CONDUCTIVITY, DIFFUSIVITY, AND UNIT SURFACE	
CONDUCTANCE OF FOODS AND AGRICULTURAL MATERIALS	122
4.1 Seeds and Grains	122
4.2 Forage materials	140
4.3 Fruits, Vegetables, and Nuts	143
4.4 Sugarbeet	164
4.5 Tobacco	165
4.6 Woods	171
4.7 Soils	173
4.8 Red Meat, Poultry, and Fish Products	178
4.9 Beet Manure	186
4.10 Dairy Products	189
4.11 soybean Meal	196
5. APPLICATIONS OF THERMAL PROPERTIES IN COOLING AND FREEZING OF	
FOODS AND AGRICULTURAL MATERIALS	198
5.1 Single Particle and Multiparticle Heat Transfer	198
5.2 Cooling of Foods and Agricultural Materials	199
Half-Cooling Time	201
Applications of Newton's Cooling Law	210
Application of Fourier's Law	225
5.3 Freezing and Thawing	242
6. APPLICATIONS OF THERMAL PROPERTIES TO HEATING AND HEAT TREATMENT	
OF FOODS AND AGRICULTURAL MATERIALS	246
6.1 Drying	246
Heated Air Drying	246
Freeze-Drying	247
6.2 Heat Treatment of Foods and Agricultural Materials	250
6.3 Heat of Respiration	271
6.4 Thermal Expansion and Structural Strength	279
Thermal Expansion	281
APPENDIX	287
List of Symbols	287
List of Tables	289
List of Figures	338
SI System of Units	374
