

CONTENTS

| | |
|--|-----|
| 1. Advances in Electron Microscopy | 1 |
| 2. Imaging Food Systems by Confocal Laser Scanning Microscopy | 53 |
| 3. Scanning Probe Microscopy of Food-Related Systems | 69 |
| 4. Electron Spin Resonance Spectroscopy for Detection Of Irradiated Food | 86 |
| 5. Ultracentrifugation of Food Biopolymers | 109 |
| 6. Rheology of Biopolymer Solutions and Gels | 139 |
| 7. Fracture Mechanics of Solid Foods | 157 |
| 8. Recent Developments in Infrared Spectroscopy and Microscopy | 177 |
| 9. Ultrasound Studies of Shelf-Life and Crystallization | 196 |
| 10. Dynamic Surface Tension and Dilational Interfacial Properties | 214 |
| 11. Light Scattering Studies of Colloid Stability and Gelation | 240 |
| 12. Small-Angle Neutron Scattering and Neutron Reflection | 268 |
| 13. High Resolution Nuclear Magnetic Resonance Spectroscopy of Solid and Semi-Solid Food Components | 296 |
| 14. Magnetic Resonance Imaging in Food Science | 319 |
| Subject Index | 343 |
