page xiii Preface

<i>List of contributors</i>	xv
Part I. Sources edible after minimal processing	
1 Protein-rich cereal seeds	1
A. K. Kaul	
2 Varietal improvement of seed legumes in India	9
<i>L. M. Jeswani</i>	
3 Minor food seeds	19
<i>D. A. V. Dendy, Bernice Emmett & O. L. Oke</i>	
4 Vegetables	27
<i>F. W. Shepherd</i>	
5 The <i>Spirulina</i> algae	33
<i>N. W. Pirie</i>	
6 Green micro-algae	35
<i>H. Tamiya</i>	
Part II. Concentrates made by mechanical extraction	
7 Protein products from coconuts	43
<i>D. A. V. Dendy</i>	
8 Soybeans: processing and products	47
<i>S. J. Circle & A. K. Smith</i>	
9 Rapeseed and other crucifers	65
<i>R. Ohlson & R. Sepp</i>	
10 Sunflower, safflower, sesame and castor protein	79
<i>Antoinette A. Betschart, C. K. Lyon & G. O. Kohler</i>	
11 Groundnut	105
<i>O. L. Oke, R. H. Smith & A. A. Woodham</i>	
12 Broad bean	117
<i>A. Hagberg & T. Sj6din</i>	
13 Concentrates by wet and dry processing of cereals	121
<i>R. M. Saunders & G. O. Kohler</i>	
14 Leaf protein	133
<i>N. W. Pirie</i>	
15 Industrial production of leaf protein in the USA	141
<i>G. O. Kohler & E. M. Bickoff</i>	

Part III. Concentrates made by biological conversion		
16	Protein from non-domesticated herbivores <i>K. L. Blaxter</i>	147
17	The use of non-protein nitrogen by ruminants <i>T. R. Preston</i>	157
18	Non-protein nitrogen in pig nutrition <i>R. Braude</i>	165
19	The domestic non-ruminant animal as consumer and provider of protein <i>A. A. Woodham</i>	169
20	The conversion of animal products such as wool and feathers into food <i>F. B. Shorland</i>	179
21	Increasing the direct consumption of fish <i>G. H. O. Burgess</i>	187
22	Fungi <i>W. E. Trevelyan</i>	201
23	Yeasts grown on hydrocarbons <i>C. A. Shacklady</i>	215
24	Variation in the composition of bacteria and yeast and its significance to single-cell protein production <i>C. L. Cooney & S. R. Tannenbaum</i>	223
Part IV. The use of novel foods		
25	Quality standards, safety and legislation <i>F. Aylward</i>	233
26	Acceptance of novel foods by the consumer <i>R. P. Devada</i>	245
	Index	253
