Chapter 1	Introduction and History of Value Engineering	
	Value to Managers and Practitioners	2
	Use of Examples	4
	Method versus Results	4
	Value Engineering – a Fundamental Approach	6
	Universal Applicability	7
	History of Value Engineering	8
Chapter 2	Basic Approach and Philosophy	
	Terminology and Definitions	12
	A Better Job Can Always Be Done	14
	Fringe Effects	16
	Value Engineering Contrasted with Normal Cost Reduction	22
Chapter 3	The Functional Approach	
	Value	24
	Functional Definition	28
	Functional Evaluation	33
	A Short Trip by Plane	40
Chapter 4	Attitudes, Roadblocks, and Creativity	
	Attitudes	43
	Roadblocks	44
	Creativity	45
Chapter 5	The Value Engineering Job Plan	
	Job Plan Phases	51
Chapter 6	The Value Engineering Techniques	62
Chapter 7	The Functions of the Value Specialist	
	Qualifications of the Value Specialist	76
	Functions of the Value Specialist	78
	Relationship with Other Functions	80
Chapter 8	Managing the Value Engineering Program	
	Control	92
	Measurement	99
	Reporting	102
	Education	104
	Applicability to Small Organizations	109
Chapter 9	Project Selection	
	Timing the Application of Value Engineering	114
	Criteria for Selection	116
Chapter 10	Cost Target Programs	
	Initial Establishment of Target	121
	Objectives of a Value Assurance Cost Target Program	122
	Organization	123
	Conducting the Program	125
	Refining the Targets	128

	Cost of the Cost Target Program	132
Chapter 11	The Effective Utilization of Subcontractors	
	Approach to Subcontractor Programs	135
	Standardizing Policies and Procedures	135
	Training Procurement Personnel	136
	Establishing Contractual Arrangements	138
	Motivating and Training Suppliers	138
Chapter 12	The Contractual Aspects of Value Engineering	
	Development of Value Engineering Clauses	142
	Types of Value Engineering Clause	144
	Sharing Possibilities	145
	Significant Features of the ASPR	147
	Content of a VECP	151
	Problem Areas	155
	VECP Sharing Examples	159
Chapter 13	Cost Reduction Programs	
	Attitudes and Values	165
	Cost Reduction Program Criteria	166
	A Cost Reduction Program in Action	173
	Typical Techniques	174
	Budget Considerations	176
	Problem Areas	177
	Reporting versus Accomplishment	179
	Form versus Substance	179
	Communication and Involvement	179
	Employee Suggestion Programs	180
Chapter 14	Value Engineering Applied to Nonhardware Projects	
	College Placement / Recruiting Workshop	187
	San Diego State College Workshop	191
	Value analysis of Management Practices (VAMP)	194
Chapter 15	Cost and Value – Technical Aspects	
	Cost Impact of Design Decisions	209
	Cost Impact of Design Parameters	211
	Maximizing Value	215
	The Impact of Value Engineering	216
	Value Standards	218
	Value Index	221
Appendix		224
Index		227
