|-----------|--|------|
|           | Introduction   | 7    |
| Chapter 1 | Scope and objectives of a plant layout                   | 9    |
|           | Definition   | 9    |
|           | The objectives of plant layout                           | 10   |
|           | Factors affecting plant layout                           | 11   |
| Chapter 2 | Basic types of layout                                    | 13   |
|           | Layout by product  | 13   |
|           | Layout by process  | 14   |
|           | Layout by fixed material location                        | 15   |
|           | Which type of layout to use                              | 16   |
|           | Comparative analysis of layout types                     | 17   |
| Chapter 3 | Procedure for effective plant layout                     | 19   |
|           | Fundamental guidelines                                   | 19   |
|           | Main phases  | 20   |
|           | Phase interrelationships                                 | 20   |
| Chapter 4 | The overall layout                                       | 21   |
|           | The flow of materials                                    | 22   |
|           | Process charting   | 22   |
|           | The operation process chart                              | 24   |
|           | The multi-product process chart                          | 26   |
|           | The flow process chart                                   | 27   |
|           | The flow diagram   | 30   |
|           | The space requirement                                    | 35   |
|           | Methods to determine space requirement                   | 41   |
| Chapter 5 | The detailed layout                                      | 47   |
|           | Degree of detail needed                                  | 47   |
|           | Graphic and other visual aids                            | 48   |
|           | Installing the selected layout                           | 50   |
| Chapter 6 | The materials handling requirement                       | 53   |
|           | General types of uses                                    | 54   |
|           | Economics of materials handling equipment                | 55   |
|           | Reliability of the equipment                             | 57   |
| Chapter 7 | Comparison of competitive equipment                      | 59   |
|           | Preparing materials handling engineering study           | 59   |
|           | Computing for materials handling cost                    | 60   |
| Chapter 8 | Types of materials handling equipment                    | 65   |
|           | Bulk materials handling equipment                        | 65   |
|           | Fixed materials handling equipment                       | 67   |
|           | Vehicular and mobile materials handling equipment        | 70   |
|           | Unit or unit load materials handling tools and equipment | 72   |
| Appendix  |  | 73   |
|           | Plant layout – chain method                              | 73   |
|           | Development of detailed layout within the section        | 77   |
