

## CONTENTS

	Page
Preface	i
About the Author	ii
1. What project Teams are All About	1
2. A Stepwise Process Improvement / Problem solving Model	5
3. An Overview of quality Improvement Tools and Their Application	9
4. Using Pareto Analysis to Define the Problem	15
5. Using Flow Diagrams to Describe the Process	19
6. Using Cause and Effect Diagrams to Identify Causes	23
7. Using Team Decision Making Techniques to Achieve Consensus	27
8. Using Check Sheets for Efficient Data Collection and Analysis	31
9. Using Frequency Distributions to Draw a Picture of the Data	35
10. Using Scatter Diagrams to Study Cause and Effect Relationships	39
11. Using Run Charts to Turn Data Into Information	47
12. Using control Charts to Attack Variation and Identify Further Improvement Opportunities	51
13. Control Charts for Variables – Construction, Application and Interpretation	55
14. Control charts for Attributes – Selecting the Right type	65
15. A Checklist for Quality Improvement Team Program Development and Implementation	71
Index	75
