Acknowledgments	xi
1. Introduction	1
Information flow in Science and Technology	2
The Information Explosion	6
User Studies	7
The Present Research and Purpose of This Volume	8
Notes	10
2. The Research Program	11
Phase 1 : The Study of Parallel or Twin Projects	11
Phase 2 : Studies of Communication Networks Structure	32
Summary	33
Notes	34
3. The Communication System in Technology : An Overview	35
Distinguishing Engineers from Scientists	35
The Nature of Technology	39
Bureaucratic Organization	40
Communication Patterns in Science and Technology	44
The Relation Between Science and Technology	46
Notes	57
4. The Technological Literature	58
Allocation of Time for Literature Use	58
Literature as an Idea Source	63
Use of the Literature in problem Definition	65
Sources of Ideas and Performance	67
A More Detailed Examination of Written Media	70
The Formal Engineering Literature	71
Informal Written Channels	87
Comparison of Formal and Informal Written Channels	96
Notes	97
5. The Importance of Communication Within the Laboratory	99
Organizational Colleagues as Sources of Information	99
The Twin Projects	100
Consulting with Organizational Colleagues	101
Variation over Time	101
Technical Ideas Originating Within the Organization	104
Internal Consulting for Other Functions in Technical Problem Solving	106
Sources of Ideas and Performance	108
The Internal Consulting Study	110
Diversity in Communication	115
Intensity Versis Diversity	121
Summary of the Evidence	122
Notes	125
6. Communications Among Organization	126
Outsiders as Sources of Information	126
The Twin Projects	127

Time Spent in Personal Contact Outside the Laboratory	128
Ideas from Outside Sources	130
Use of Outsiders to Aid in Problem Definition	132
The Contribution of outsiders	134
The Technological Gatekeeper	141
Notes	180
7. Structuring Communication Networks 1 : The Influence of Formal and Informal Organization	182
Barriers to Promoting Internal Consultation	182
The Decision to use a Channel	184
First Source Selection	184
The Effect of Experience	187
The Order of Search in Information Seeking	188
The Nature of the Consulting Process	191
Strategies for Reducing Cost	195
The Influence of Organization on Communication Patterns	206
The Formal Organization	211
The Informal Organization	220
The Impact of Status on Communication	228
Notes	233
8. Structuring Organizational Communication Networks 2 : The Influence of Architecture on Communication	234
Proximity and Behavior	234
Research Method	235
Results	236
Organizational Bonds	240
Office Arrangements	242
Vertical Separation	242
Interaction-Promoting Facilities	248
An Experiment in Laboratory Design	249
Notes	265
9. A Field Experiment to Improve Communication : The Nonterritorial Office	266
The Effect of Indirect Travel Routes on communication Probability	266
The Nonterritorial Office Experiment	269
Intradepartmental Communication Patterns	279
The Territorial Imperative Revisited	281
Total Floor Space	285
Interdepartmental Communication	286
Performance of the Department	288
Conclusions from the Experiment	290
Notes	292
10. Where Are We?	293
Scientific and Technological Information Policy	293
Organizational Behavior	294
Appendix	296
References	307
Subject Index	313
Name Index	319
