Introduction	1
The Advancing QC Circle movement	5
The QC Circle and human relationships	15
QC Circle activities and implementation of QC techniques	30
The QC Circle and training	40
Smaller enterprises and QC Circle activities	52
 Cases	
Cases 1 Eliminating machining errors	63
Cases 2 Reduction of dimensional defects in felt	71
Cases 3 Rewind cutting process improved	81
Cases 4 Reduction of defects in metal plates	87
Cases 5 Reducing refrigerator component processing defects	95
Cases 6 Simplification of the weighing of rubber compounding ingredients	103
Cases 7 Replacement of intermediate inspection by independent inspection	109
Cases 8 Reduction of raw silk sticking	117
Cases 9 Reduction of defective soldering work in assembling electrical appliances	125
Cases 10 Taking the leadership in quality control	133
Cases 11 Early operation of newly installed machinery	141
Cases 12 Increasing efficiency by improving operation methods	149
Cases 13 Improvement of the operating rate of synthetic yarn spinning	159
Cases 14 Providing incentives to the QC Circle through an evaluation system	167
Cases 15 Reduction in deflection of gear shafts	173
Cases 16 Improvement in cylinder bore smoothness	179
Cases 17 The QC Circle movement (applied to shop requirements)	187
Cases 18 Elimination of inspection in the 'A' packing process	199
