Preface to the revised English edition	vii
Preface to the original edition	ix
How to use this book	xi
Chapter 1 How to collect data	1
1.1 The purpose of collecting data	1
1.2 Correct data	2
1.3 Kind of data	3
1.4 Analysis of data	4
1.5 Reminders for collecting data	4
Chapter 2 Histograms	6
2.1 Data have dispersion	6
2.2 How to prepare a histogram	7
2.3 How to use a histogram	10
Chapter 3 Cause-and-effect diagram (CE diagram)	18
3.1 Why does quality dispersion occur?	18
3.2 Making cause-and-effect diagrams (general steps)	19
3.3 Various methods for making cause-and-effect diagrams	22
3.4 How to use a cause-and-effect diagram	24
3.5 The development of cause-and-effect diagrams and the future	26
Chapter 4 Check sheets	29
4.1 Quality control and check sheets	29
4.2 Function of check sheets	29
4.3 Check sheet for production process distribution	30
4.4 Defective item checks	31
4.5 Defect location check sheet	33
4.6 Defect cause check sheet	35
4.7 Check-up confirmation check sheet	36
4.8 Other check sheets	41
Chapter 5 Pareto diagrams	42
5.1 What is a Pareto diagram?	42
5.2 How to make a Pareto diagram	43
5.3 How to use a Pareto diagram	45
5.4 Try to have the vertical axis represent amounts of money	50
Chapter 6 Graphs	51
6.1 What is a graph?	51
6.2 Various graphs	51
6.3 Examples of use of graphs	56
6.4 From graphs to statistical control methods	61
Chapter 7 Control charts I	62
7.1 What is a control chart?	62
7.2 Types of control charts	64
7.3 Making the \bar{x} -R control chart	66
Chapter 8 Control Charts II	71
8.1 Point movements on \bar{x} -R control charts	71

8.2	How to read control charts	76
8.3	How to draw p and np control charts	78
8.4	How to make u charts and c charts	82
8.5	How to use control charts	86
Chapter 9	Scatter diagrams	87
9.1	Relationship between cause and effect	87
9.2	What is a scatter diagram?	88
9.3	How to make a scatter diagram	90
9.4	Reading scatter diagrams	92
9.5	Testing correlation with scatter diagrams	93
9.6	Care in using scatter diagrams	95
Chapter 10	Binomial probability paper	98
10.1	What is a binomial probability paper?	98
10.2	Structure of a binomial probability paper	98
10.3	The test for population fraction defective	100
10.4	Comparing two groups of paired corresponding data	101
10.5	Test for correlation	104
10.6	2 x 2 contingency tables	107
10.7	2 x m contingency tables	108
Chapter 11	Sampling	111
11.1	What is sampling?	111
11.2	Statistical thinking, and sampling	112
11.3	Random sampling	113
11.4	Sampling error	115
11.5	Types of sampling	117
Chapter 12	Sampling inspection	120
12.1	What is sampling inspection?	120
12.2	Problems of total inspection	120
12.3	Situations where sampling inspection is necessary	121
12.4	Lot quality	121
12.5	OC (operating characteristics) Curves and acceptance sampling	124
Chapter 13	Practice problems	141
13.1	How to collect data	141
13.2	Histograms	145
13.3	Cause-and-effect diagrams	152
13.4	Check sheets	161
13.5	Pareto diagrams	166
13.6	Graphs	175
13.7	Control Charts I	186
13.8	Control charts II	194
13.9	Scatter diagrams	199
13.10	Binomial probability paper	206
13.11	Sampling	213
13.12	Sampling inspection	219
List of Appendices		
Appendix I	Sign Test Table	223
Appendix II	α and R scales for binomial probability papers	226
