Part I	
SUMMARY	1
1 INTRODUCTION	3
1.1 Purpose	3
1.2 Models	3
1.3 Limitations	7
1.4 Design of the book	12
2. TERMINOLOGY AND MODELS	13
2.1 Innovation	13
2.2 Creativity	16
2.3 Diffusion	17
3. GENERATION OF IDEAS	21
3.1 Models	21
3.2 Methods	25
4. UTILISATION OF IDEAS	30
4.1 Model	31
4.2 Methods	33
5. PREPARATION FOR IMPLEMENTATION	40
5.1 Model	40
5.2 Methods	41
6. MANUFACTURING AND MARKETING	44
6.1 Model	45
6.2 Methods	46
7. STRATEGY	50
7.1 Strategy formulation – models	52
7.2 Strategy formulation – methods	58
7.3 Diversification Studies – models	59
7.4 Diversification Studies – methods	62
8. PRODUCTION PLANNING	64
8.1 Models	67
8.2 Methods	77
9. ORGANISATION	79
9.1 Models	79
9.2 Methods	87
Part II	
1. INTELLIGENCE – NEED RELATED	93
1.1 Need Confrontation	93
1.2 User observation	94
1.3 User contacts	95
1.4 Surveillance of competitors	97
1.5 Surveillance of government regulations	98
1.6 Surveillance of market sectors	99

2.	INTELLIGENCE – TECHNOLOGY RELATED	101
2.1	Surveillance of technology	101
2.2	Development of technological competence	102
2.3	Surveillance of resources	103
2.4	Industrial espionage	104
3.	FORECASTING	107
3.1	Scenario technique	107
3.2	Delphi technique	109
3.3	Trend extrapolation technique	110
3.4	Relevance-tree technique	112
3.5	System dynamics	113
3.6	Structural models	115
3.7	Cross-impact analysis	117
4.	DEVELOPMENT OF CREATIVITY	119
4.1	Creativity tests	119
4.2	Climate measurements	120
4.3	Morphological technique	122
4.4	Brainstorming	123
4.5	Forced relationship technique	125
4.6	Synectics	126
4.7	Eclectic approach for creative thinking	127
4.8	Work simplification	129
4.9	Suggestion system	129
5.	PRELIMINARY STUDY	130
5.1	Feasibility study	130
5.2	Technology assessment	131
5.3	Patent search	133
5.4	Ecological analysis	134
5.5	Resource analysis	136
5.6	Legal analysis	137
6.	PROJECT FORMULATION	139
6.1	Project Selection technique	139
6.2	Develop/buy analysis	140
6.3	Acquisition of licences	142
6.4	Legal protection	143
7.	PREMININARY ANALYSIS	145
7.1	Quality level planning	145
7.2	Scheduling – network models	146
7.3	Scheduling – gantt charts	147
8.	MARKET RESEARCH	148
8.1	Use of internal market statistics	148
8.2	Use of external market statistics	149
8.3	Current market studies	151
8.4	Special market studies	152
9.	COST ESTIMATES	154
9.1	Risk analysis	154
9.2	Project cost	156
9.3	Product cost	156
9.4	Investment cost and profitability	156
10.	DESIGN	157
10.1	Applied research	157
10.2	Styling (shape and colour)	158

10.3	Catalogue aided design	160
10.4	Alternative design approaches	161
10.5	Computer aided design	162
10.6	Design and testing of models	163
10.7	Standardisation	165
10.8	Design for demanufacturing	166
11.	DESIGN EVALUATION	168
11.1	Value analysis	168
11.2	Reliability analysis	169
11.3	Ergonomic analysis	170
11.4	Useful life analysis	172
11.5	Maintenance analysis	173
11.6	Fault analysis by brainstorming	174
11.7	Fault analysis by logical methods	175
11.8	Design review	176
12.	DESIGN CALCULATION	178
12.1	Stress Calculation	178
12.2	Mechanical vibration calculation	178
12.3	Flow calculation	178
12.4	Thermal calculation	179
12.5	Cybernetic calculation	179
13.	QUALITY VERIFICATION	180
13.1	Laboratory testing	180
13.2	User testing	181
14.	MANUFACTURING PREPARATION	183
14.1	Make / buy analysis	183
14.2	Equipment and tooling	183
14.3	Process and operation planning	183
14.4	Material planning	184
14.5	Quality control planning	184
14.6	Design for manufacturing	184
15.	MARKETING PREPARATION	185
15.1	Distribution	185
15.2	Sale of licences	187
15.3	Advertising	188
15.4	Sales promotion	188
15.5	Sales planning	188
15.6	Trade marks	189
16.	TEST MARKETING	190
16.1	Use of test area	190
16.2	Use of trade fairs	191
17.	INTRODUCTION	194
17.1	Selection of strategy for introduction	194
17.2	Recording of actual sales	195
18.	REGISTRATION OF MANUFACTURING AND MARKETING DATA	196
18.1	Registration of quality parameters	196
18.2	Quantity	197
18.3	Sales	197
18.4	Costs	197
19.	METHODS FOR EVALUATION OF PRODUCTS AND PROCESSES	198
19.1	Field reports	198

19.2	Project evaluation	199
20.	ELIMINATION ANALYSIS	201
20.1	Product – market matrix	201
20.2	Life cycle analysis	202
20.3	Sales trends	203
20.4	Profit data	205
21.	STRATEGY FORMULATION	207
21.1	Gap analysis	207
21.2	Capability analysis	208
21.3	Competitive strengths – market attractiveness matrix	210
21.4	Market share – market growth matrix	213
21.5	Product/market – strategic option matrix	215
21.6	Performance criteria	216
22.	DIVERSIFICATION STUDIES	218
22.1	Need – technology – customer matrix	218
22.2	Diversification area – capability matrix	220
22.3	Screening procedures	221
23.	PRODUCT PLANNING TOOLS	224
23.1	Product proposal form	224
23.2	Product council	225
23.3	Development order	227
23.4	Product calendar	229
24.	PRODUCT INNOVATION ORGANISATION	231
24.1	Preparation checklist	231
24.2	Factor Checklist	233
24.3	Problem definition checklist	235
24.4	Integration checklist	237
24.5	Structure checklist	239
24.6	Idea generation checklist	241
24.7	Idea realisation checklist	243
	APPENDICES	245
1.	Scansteel – case study	245
2.	Mentronics – case study	262
3.	Norsk data – case study	273
4.	Acquisition of knowledge – checklist	285
5.	Organisation theories / management schools	286
