	Page
Preface	v
1. The Task of Management	1
2. Research, Development and Design	9
3. Factory Sites and Buildings	23
4. Plant Selection, Layout and Maintenance	41
5. Selection and Planning of Manufacturing Processes	64
6. Materials Handling	75
7. Value Analysis and Standardization	90
8. Work Study and Ergonomics	99
9. Human Aspects of Production Management	131
10. Control of Quality	145
11. Measurement of Industrial Performance	166
12. The Production Control Department	183
13. Planning for Component Manufacture	188
14. Works Order Documents and their Use	213
15. Stores Organization and Control	225
16. Machine Loading and Progressing	240
17. Punched-card Equipment for Production Control	250
18. Operational Research	264
19. Network Analysis	277
20. Systems Engineering and Computers	289
Bibliography	303
Index	309
