Preface	vii
Introduction	1
From Art to Science	2
The Perspective of the Computer as a Management tool	3
Hardware and Software	4
The Computer and Business	6
Information and Automatic Control	7
Information-feedback Control Theory	13
The Computer Change	15
The Total System	16
Value of Information	18
Summary	19
PART ONE The “What”	
One the “What” of Management Control	23
Computers in Decision Making	24
The Management Control Hierarachy	26
Management Control Cycle	33
Policy	37
Detecting the guiding Policy	40
Summary	50
Two Control functions	53
Information	53
What Do Computers Do in Plants?	55
The Trend to Computer Control	61
Control Systems	62
Three Management control systems	67
Some Definitions	68
An Implicit Description	68
Types of Control	68
Types of Decision	70
The Decision-making process	71
The Decision-making Environment	72
The Objective	73
Functions of a Management Control System	73
Performance Measurement	75
The Language Barrier	76
Management Considerations	76
Four managers and Management Information Systems	78
Elements of the Business System	79
Dynamic Function	80
Organization and Procedures	81
Management Data Output	83
Process Control	85
Summary	87

PART TWO The “How”	
Five Basic Definitions and Stages of System Design	91
Basic Definitions – Management Information and Control Systems	92
Stages of System Design	94
Six Applied Control theory	104
Basic Control Principles	105
Applied Control Cycle	114
The Manager’s Questions	127
Case Study	131
Summary	138
Seven Management System Elements or Building Blocks	142
Planning	145
Present Position	146
Current Plan	157
Forward Look	158
Optimization	159
Summary	163
Eight The Concept of Mathematical Models	164
Management Control Structure Modeling	166
The use of Corporate Modeling Methods	167
Dynamic Corporate Simulation	170
Optimal Control Models	173
Summary	175
Nine Dynamic Analysis and Simulation of Management Control Functions	176
Ten Tools and Models	179
The Tools of Mathematics	179
The Major Models	186
PART THREE Applications	
Eleven Marketing Management Information and Control System	201
What a Marketing MICS Is	201
An Example of MICS in a Petroleum Company	202
Management Science in Marketing	205
Decision Making	205
The Status of Management Science in Marketing	206
Management Science and the Marketing manager	207
Conclusion	209
Twelve An Inventory Control Process	211
Thirteen Management Information and Control System for Process and Plant	216
Introduction	216
Present Information Systems	217
The Impact of Operations Research on Information Systems	219
The Hierarchical Approach to Information Needs	221
The Dynamic Nature of Information Systems	224
Impact on Research and Development	225
Summary	226
An Actual Example	227
Fourteen A Management Information and control System for Flat-rolled Steel Products	244
Introduction	245
Application Base	250
The Application of MICS	256
Example of the system in Action	263

Some Benefits and Advantages	267
PART FOUR Conclusions and a Look at the Future	
Fifteen Conclusions and Forecasts	271
Tools at Hand	273
The Firm of Tomorrow	274
In summary	275
False Impressions	277
Foundations	278
An Approach	279
A Selected Bibliography	281
Index	283
