Preface	ix
Authors	xi
Acknowledgements	xiii
Symbols and Abbreviations	xvii
Table of Chemical Elements	xxi
Units Conversion Table	xxiii
General References	xxvi
1 Rock-Forming Minerals and Rocks	1
1.1 Introduction 1 1.2 Silica minerals and rocks 8 1.3 Silicate minerals 29 1.4 Silicate rocks 54 1.5 Calcareous minerals and rocks, and magnesite 68 1.6 Literature 89	
2 Lime, Cement and Concrete	91
2.1 Lime 91 2.2 Portland cement 96 2.3 Special cements 104 2.4 Concrete 109 2.5 Literature 114	
3 Abrasives	115
3.1 History of abrasives 115 3.2 Abrading in general 118 3.3 Natural abrasives 126 3.4 Diamond abrasives 132 3.5 Manufactured abrasives 135 3.6 Metallic abrasives 147 3.7 Bonded abrasives 150 3.8 Coated abrasives 157 3.9 Miscellaneous abrasive products 162 3.10 Uses of abrasives 162 3.11 Statistics 181 3.12 Literature 183	
4 Adsorptive Materials	185
4.1 Adsorption 185 4.2 Adsorptive materials 189 4.3 Chromatography 201 4.4 Literature 206	
5 Clay and Ceramic Products	207
5.1 Clay 207 5.2 Building, facing and paving bricks 218 5.3 Other structural ceramic ware 259 5.4 Refractories 267 5.5 Whiteware 293 5.6 Porcelain 313 5.7 Other special ceramics 326 5.8 Literature 330	

6	Glass	331
	6.1 History of glass 331 6.2 Nature and properties of glass 332 6.3 Various glasses and their properties 351 6.4 Raw materials for glass-making 356 6.5 Melting of glass 362 6.6 Conditioning and forming of glass 367 6.7 Secondary operations in glassware manufacture 386 6.8 Testing glass 397 6.9 Uses and required properties of glass and glassware 402 6.10 Glass production and usage-statistics 411 6.11 Literature 412	
7	Natural Graphite	413
	7.1 History 413 7.2 Occurrence 413 7.3 Mining and beneficiation 417 7.4 Production of synthetic graphite 419 7.5 Structure and properties 420 7.6 Production of refractory articles 428 7.7 Production of pencils 430 7.8 Other uses 431 7.9 Statistics 434 7.10 Literature 437	
8	Diamond and Other Precious Stones	439
	8.1 Diamond 439 8.2 Other gemstones 507 8.3 Literature 542	
9	Solid Mineral Fuels	543
	9.1 Solid mineral fuels in general 543 9.2 Hard coal 553 9.3 Literature 587	
10	Carbonization of Coal	589
	10.1 Introduction 589 10.2 Coke and gas production 590 10.3 Coals gas and coke oven gas 606 10.4 Producer gas and water gas 618 10.5 Carbonization products from lignite or coal 624 10.6 Activated carbon or charcoal 627 10.7 Carbon black 632 10.8 Baked and graphitised carbon products 636 10.9 Literature 644	
11	Other Carbonization Products	645
	11.1 Activated carbons 645 11.2 Baked and graphitised carbon products 654 11.3 Carbon blacks 678 11.4 Further carbonization products 694	
12	Energy	705
	12.1 Sources of energy 705 12.2 Heat energy from chemical and nuclear reactions 712 12.3 Heat transport and steam 737 12.4 Electrical energy from heat 752 12.5 Electrical energy from chemical and nuclear reactions 766 12.6 Distribution and uses of electrical energy 785 12.7 Literature 795	
	Index	797
