Preface	ix
Authors	xi
Acknowledgements	xii
Symbols and Abbreviations	xix
Table of Chemical Elements	xxiii
Units Conversion Table	xxv
General References	xxix
1 Metals in General	1
1.1 Structure and properties of metals 1 1.2 Heat treatment 19 1.3 Economic aspects of metal selection 37 1.4 Mechanical testing 40 1.5 Metallographic examination 63 1.6 Non-destructive testing 72 1.7 Literature 80	
2 Ores in General	81
2.1 Ore mining 81 2.2 Processing of metalliferous ores 97	
3 Iron and Steel	123
3.1 History 123 3.2 Iron ores and the manufacture of pig iron 131 3.3 Steel-making 151 3.4 Steels and cast iron 191 3.5 Heat treatment and hardness of steels 209	
4 Non-ferrous Metals	235
4.1 Introduction 235 4.2 Beryllium 236 4.3 Magnesium 240 4.4 Aluminium 243 4.5 Gallium, indium and thallium 252 4.6 Germanium 255 4.7 Tin 256 4.8 Lead 261 4.9 Antimony 265 4.10 Bismuth 267 4.11 Cobalt 269 4.12 Nickel 274 4.13 The platinum group metals 280 4.14 Copper 284 4.15 Silver 293 4.16 Gold 297 4.17 Zinc 301 4.18 Cadmium 307 4.19 Mercury 308 4.20 Titanium 310 4.21 Zirconium 316 4.22 Vanadium 319 4.23 Niobium (Columbium) 321 4.24 Tantalum 326 4.25 Chromium 327 4.26 Molybdenum 329 4.27 Tungsten 335 4.28 Manganese 337	

5	Metal Casting	341
	5.1 Introduction 341 5.2 Patterns 346 5.3 Moulding and core-making in general 356 5.4 Sand moulding 359 5.5 Investment moulding and casting process 381 5.6 Other precision moulding processes 387 5.7 Some particular casting equipment and casting methods 392 5.8 Cores and core materials 396 5.9 Pouring and feeding of castings 404 5.10 Metal melting 420 5.11 Metals cast in the foundry 429 5.12 Evaluation of castings 446	
6	Metal Deformation	455
	6.1 Metal deformation in general 455 6.2 Rolling 462 6.3 Extrusion 473 6.4 Forging 480 6.5 Drawing 491 6.6 Deep drawing and pressing 493 6.7 Spinning 495 6.8 Bending 496 6.9 Recent developments in metal deformation 501 6.10 Products of mechanical deformation processes 505 6.11 Literature 521	
7	Working of Metals by Cutting	523
	7.1 History of metal cutting 523 7.2 Cutting in general 527 7.3 Turning and boring 538 7.4 Drilling, reaming and tapping 546 7.5 Milling 552 7.6 Shaping, slotting and planing 556 7.7 Broaching 558 7.8 Gear cutting 561 7.9 Sawing 568 7.10 Grinding, lapping and honing 570 7.11 Numerically controlled machine tools 576 7.12 Literature 579	
8	Joining of Metals	581
	8.1 Classification of joining methods 581 8.2 Mechanical methods of joining 586 8.3 Welding methods involving pressure 589 8.4 Fusion welding 601 8.5 Metallurgical surface bonding 632 8.6 Design of metallurgical joints 641 8.7 Adhesive joining of metals 644 8.8 Literature 665	
9	The Surface Treatment of Metals	669
	9.1 Introduction 669 9.2 Choice of surface treatment 670 9.3 Metallic coatings 671 9.4 Miscellaneous non-metallic coating processes 710 9.5 Vitreous enamel 717 9.6 Lacquer, varnish, enamel and paint coatings 719 9.7 Plastic coatings 727 9.8 Literature 727	
10	Metal Powders and Hard Metals	729
	10.1 Introduction 729 10.2 Metal powders 730 10.3 Hard metals 774 10.4 Literature 780	
11	The Corrosion of Metals	783
	11.1 Corrosion in general 783 11.2 Reaction mechanism of corrosion 786 11.3 Forms of corrosion in the absence of stress 801 11.4 Corrosion in the presence of stress 813 11.5 Corrosion of metals 820 11.6 Cathodic protection 841 11.7 Corrosion control 845 11.8 Literature 850	
12	Composite Materials	853
	12.1 Principles of composite materials 853 12.2 Particulate composites 862 12.3 Fibre composites 869 12.4 Planar composites 882 12.5 The future of composites 886 12.6 Literature 887	
	Index	889
