	3 Chemistry and Applications of Iron-TAML Catalysts in Green	
		Oxidation Processes Based on Hydrogen Peroxide 39
		Terrence J. Collins, Sushil K. Khetan, and Alexander D. Ryabov
	3.1	Introduction 39
	3.2	Properties of Fe-TAMLs and Mechanisms of Oxidation
		with Hydrogen Peroxide 40
	3.2.1	Properties of Tetraamido Macrocyclic Iron(III) Complexes
		in the Solid State and in Water 40
	3.2.1.1	Solid-State Structure and Speciation in Water 40
	3.2.1.2	Binding of Axial Ligands in Water 42
	3.2.2	Demetalation of Fe-TAMLs 45
	3.2.2.1	Induced by the Proton (Specific Acid) 45
	3.2.2.2	Induced by General Acids 46
	3.2.3 Understanding Mechanisms of Catalysis by Fe–TAML Activators of	
	Hydrogen Peroxide 48	
	3.2.3.1	General Mechanism 48
	3.2.3.2	Mechanism of Benzoyl Peroxide Activation 50
	3.2.3.3	Nature of Oxidized TAMLs: Hypotheses and Facts 51
3.2.4 The Activity–Stability Parameterization of Homogeneous Green		
		Oxidation Catalysts 54
	3.2.4.1	Kinetic Model for Parameterization 54
	3.2.4.2	Model Verifications 59
	3.3	Applications of Fe–TAMLs 61
	3.3.1	Degradation of Phosphorothioate and Phosphate Esters 61
	3.3.1.1	Total Degradation of Organophosphorus (OP) Pesticides 61
	3.3.1.2	Decontamination of Chemical Warfare Agents 63
	3.3.2	Sulfoxidation Reactions 64
	3.3.2.1	Reactions of Organic Sulfides 64
	3.3.2.2	Decontamination of Sulfur Mustard 64
	3.3.2.3	Removal of Benzothiophene and Dibenzothiophenes from Diesel 65
	3.3.3	Breaking of Disulfide Bonds and the Likely Significance for the
	2224	Disinfection of Spores 66
	3.3.3.1	Oxidative Rupture of Organic Disulfides 66
	3.3.3.2	Deactivation of Microbial Pathogens 66
	3 3 4	Oxidative Degradation of Phenols 67

3.3.4.1	Total Degradation of Trichloro- and Pentachlorophenols 67		
3.3.4.2	Total Degradation of Nitrophenols 68		
3.3.5	Degradation of Emerging Micropollutants 69		
3.3.5.1	Endocrine-disrupting Compounds 70		
3.3.5.2	Degradation of Pharmaceutical Active Ingredients (PAIs) 70		
3.3.6	Bleaching of Azo Dyes 71		
3.3.7	Pulp Bleaching and Craft Mill Effluent Treatment (P _{Fe} Process) 72		
3.4	Conclusion 73		
	References 74		
4	Microwave-Accelerated Homogeneous Catalysis in Water 79		
	Luke R. Odell and Mats Larhed		
4.1	Introduction 79		
4.1.1	Microwave Heating 79		
4.1.2	Water as a Green Reaction Medium 81		
4.1.3	Homogeneous Transition Metal Catalysis 81		
4.1.4	Microwave-Assisted Metal Catalysis in Water 82		
4.2	Suzuki–Miyaura Reactions 82		
4.3	The Stille Reaction 85		
4.4	The Hiyama Cross-Coupling Reaction 86		
4.5	The Heck Reaction 86		
4.6	Carbonylation Reactions 88		
4.7	The Sonogashira Reaction 90		
4.8	Aryl–Nitrogen Couplings 91		
4.9	Aryl–Oxygen Couplings 92		
4.10	Miscellaneous Transformations 92		
4.11	11 Conclusion 94

	7	Industrial Applications of Homogeneous Enantioselective Catalysts 153
		Hans-Ulrich Blaser, Garrett Hoge, Benoît Pugin, and Felix Spindler
	7.1	Introduction and Scope 153
	7.2	Critical Factors for the Technical Application of Homogeneous
		Enantioselective Catalysts 155
	7.2.1	Characteristics of the Manufacture of Enantiomerically Enriched
		Products 155
	7.2.2	Characteristics of Enantioselective Catalytic Processes 156
	7.2.3	Critical Factors for the Application of Enantioselective Catalysts 156
	7.2.4	Classification of Enantioselective Transformations 157

7.3	Industrial Processes: General Comments 157			
7.4	Hydrogenation of C=C Bonds 159			
7.4.1	Hydrogenation of Dehydro-α-amino Acid Derivatives 159			
7.4.1.1	L-Dopa (Monsanto, VEB Isis-Chemie) 159			
7.4.1.2	Aspartame (Enichem/Anic, Degussa) 161			
7.4.1.3	Various Pilot- and Bench-Scale Processes for the Synthesis of α-Amino			
	Acid Derivatives 161			
7.4.2	Hydrogenation of Dehydro-β-amino Acid Derivatives 163			
7.4.2.1	Sitagliptin (Merck) 164			
7.4.3	Hydrogenation of Simple Enamides and Enol Acetates 164			
7.4.4	Hydrogenation of Itaconic Acid Derivatives 166			
7.4.5	Hydrogenation of Allylic Alcohols and α,β-Unsaturated Acids 167			
7.4.5.1	Hydrogenation of Allylic Alcohols 167			
7.4.5.2	Hydrogenation of α ,β-Unsaturated Acids 168			
7.4.5.3	Hydrogenation for Synthon A of Aliskiren (Speedel/Novartis) 169			
7.4.6	Hydrogenation of Miscellaneous C=C Systems 171			
7.4.6.1	Hydrogenation of a Biotin Intermediate (Lonza) 171			
7.4.6.2	Synthesis of (+)-Methyl cis-Dihydrojasmonate (Firmenich) 172			
7.4.6.3	Intermediate for Tipranavir 172			
7.4.6.4	Intermediate for Candoxatril 173			
7.4.6.5	Intermediate for Pregabalin 173			
7.5	Hydrogenation of C=O Bonds 175			
7.5.1	Hydrogenation of α-Functionalized Ketones 175			
7.5.2	Hydrogenation of β-Functionalized Ketones 177			
7.5.3	Hydrogenation of Aromatic Ketones 178			
7.6	Hydrogenation of C=N Bonds 181			
7.6.1	(S)-Metolachlor Process 181			
7.7	Oxidation Processes 183			
7.7.1	Sulfide Oxidation 183			
7.7.1.1	Esomeprazole (AstraZeneca) 183			
7.7.2	Sharpless Epoxidation 185			
7.7.2.1	Glycidol (PPG-Sipsy) 185			
7.7.2.2	Disparlure (J.T. Baker) 185			
7.7.3	Jacobsen Epoxidation 186			
7.7.3.1	Indene Oxide (ChiRex) 186			
7.7.4	Sharpless Dihydroxylation (AD) and Aminohydroxylation 187			
7.8	7.8 Miscellaneous Transformations (Isomerization, Addition Reactions			
	C=C, C=O and C=N Bonds, Opening of Oxacycles) 188			
7.8.1	Isomerization, Allylic Alkylation 188			
7.8.1.1	(—)-Menthol Process (Takasago) 188			
7.8.1.2	Various Alkylation Reactions 189			
7.8.2	Addition Reactions to C=C Bonds 189			
7.8.2.1	Cilastatin (Sumitomo) 190			
7.8.3	Addition Reactions to C=O Bonds 190			
7.8.4	Addition Reactions to C=N Bonds 192

lonic Liquids and Green Chemistry – an Extended Preface XIII About the Editors XXI List of Contributors XXIII

Part I Green Synthesis 1

ī	The Green Synthesis of Ionic Liquids 3
	Maggel Deetlefs and Kenneth R. Seddon
1.1	The Status Quo of Green Ionic Liquid Syntheses 3
1.2	Ionic Liquid Preparations Evaluated for Greenness 4
1.3	Which Principles of Green Chemistry are Relevant to Ionic
	Liquid Preparations? 6
1.4	Atom Economy and the E-factor 7
1 .4 .1	Atom Economy 7
1.4.2	The E-factor 8
1.5	Strengths, Weaknesses, Opportunities, Threats (SWOT) Analyses 8
1.6	Conductive Heating Preparation of 1-Alkyl-3-methylimidazolium
	Halide Salts 8
1.7	Purification of 1-Alkyl-3-methylimidazolium Halide Salts 12
1.7.1	SWOT Analysis: Conductively Heated Preparation of 1-Alkyl-3-
	Methylimidazolium Halide Salts and Their Subsequent Purification 14
1.8	Ionic Liquid Syntheses Promoted by Microwave Irradiation 15
1.8.1	Microwave-assisted Versus Traditional Ionic Liquid Preparations 18
1.8.2	SWOT Analysis: Microwave-promoted Syntheses of Ionic Liquids 18
1.9	Syntheses of Ionic Liquids Promoted by Ultrasonic Irradiation 20
1.9.1	SWOT Analysis: Ultrasound-promoted Syntheses of Ionic Liquids 22
1.10	Simultaneous Use of Microwave and Ultrasonic Irradiation to
	Prepare Ionic Liquids 23
1.10.1	SWOT Analysis: Simultaneous Use of Microwave and Ultrasonic
	Irradiation to Prepare Ionic Liquids 24
1.11	Preparation of Ionic Liquids Using Microreactors 25
1 11 1	SWOT Analysis: Preparation of Ionic Liquids Using Microreactors 27

vı	Contents	
	1.12	Purification of Ionic Liquids with Non-halide Anions 28
	1.12.1	Purification of Hydrophobic Versus Hydrophilic Ionic Liquids 28
	1.12.2	SWOT Analyses: Purification of Hydrophobic and Hydrophilic
		Ionic Liquids 29
	1.13	Decolorization of Ionic Liquids 31
	1.13.1	SWOT Analysis: Decolorization of Ionic Liquids 31
	1.14	Conclusion 34
		References 36
	Part II	Green Synthesis Using Ionic Liquids 39
	2	Green Organic Synthesis in Ionic Liquids 41
		Peter Wasserscheid and Joni Joni
	2.1	General Aspects 41
	2.1.1	The Extremely Low Vapor Pressure of Ionic Liquids 43
	2.1.2	Stability of Ionic Liquids in Organic Reactions 44
	2.1.3	Liquid-Liquid Biphasic Organic Reactions 46
	2.1.3.1	Tunable Solubility Properties 47
	2.1.3.2	Product Isolation from Organic Reactions with Ionic Liquids 49
	2.1.4	Reactive or Catalytic Ionic Liquids in Organic Synthesis 51
	2.2	Friedel-Crafts Alkylation 54
	2.2.1	Introduction and Technical Background 54
	2.2.2	Ionic Liquids in Friedel-Crafts Reaction - the Unique Selling Point 55
	2.2.3	Liquid-Liquid Biphasic Catalysis 56
	2.2,4	Supported Ionic Liquid Phase (SILP) Friedel-Crafts Catalysis 57 References 59
	3	Transition Metal Catalysis in Ionic Liquids 65 Peter Wasserscheid
	3.1	Solubility and Immobilization of Transition Metal Complexes
		in Ionic Liquids 65
	3. 2	Ionic Liquid-Catalyst Interaction 67
	3.2.1	Activation of Transition Metal Complexes by Lewis Acidic
		Ionic Liquids 68
	3.2.2	In Situ Carbene Complex Formation 68
	3.3	Distillative Product Isolation from Ionic Catalyst Solutions 70
	3.4	New Opportunities for Biphasic Catalysis 72
	3.5	Green Aspects of Nanoparticle and Nanocluster Catalysis
		in Ionic Liquids 75
	3.6	Green Aspects of Heterogeneous Catalysis in Ionic Liquids 77
	3.7	Green Chemistry Aspects of Hydroformylation Catalysis
		in Ionic Liquids 79
	3.7.1	Feedstock Solubility 79
	272	Catalast Calubility and Immobilization 90

3.7.3	Use of Phosphite Ligands in Ionic Liquids 81
3.7.4	Halogen-containing Ionic Liquids Versus Halogen-free
	Ionic Liquids in Hydroformylation 81
3.7.5	Hydroformylation in scCO ₂ -Ionic Liquid Multiphasic Systems 82
3.7.6	Reducing the Amount of Ionic liquid Necessary – the Supported Ionic
	Liquid Phase (S1LP) Catalyst Technology in Hydroformylation 83
3.8	Conclusion 85
	References 85
4	lonic Liquids in the Manufacture of 5-Hydroxymethylfurfural from
	Saccharides. An Example of the Conversion of Renewable
	Resources to Platform Chemicals 93
	Annegret Stark and Bernd Ondruschka
4.1	Introduction 93
4.1.1	Areas of Application for HMF and its Derivatives 95
4.1.1.1	Direct Uses of HMF 95
4.1.1.2	Derivatives of HMF 96
4.1.2	Summary. Application of HMF and Its Derivatives 98
4.2	HMF Manufacture 99
4.2.1	General Aspects of HMF Manufacture 99
4.2.2	Methods of Manufacture of HMF from Fructose 100
4.2.3	Methods of Manufacture of HMF from Sugars Other
	Than Fructose 104
4.2.4	Deficits in HMF Manufacture 105
4.3	Goals of Study 105
4.4	HMF Manufacture in Ionic Liquids - Results of Detailed Studies
	in the Jena Laboratories 105
4.4.1	Temperature 106
4.4.2	Concentration and Time 106
4.4.3	Effect of Water 108
4.4.4	Effect of Purity 109
4.4.5	Effect of the Choice of Ionic Liquid 111
4.4.6	Other Saccharides 112
4.4.7	Continuous Processing of HMF 114
4.5	Conclusion 117
