

CONTENTS

1. Introduction	3
2. Chemical Hazards	26
3. Hazards in Process Operations	31
4. Methods for Hazard Identification and Evaluation	44
5. Overview of Principles of Control	58
6. Guide to Facility Inspections	85
7. Costs of Accidental Release Prevention	89
8. References	99
Part II Prevention and Protection Technologies	
1. Introduction	163
2. Process Design Considerations	169
3. Physical Plant Design Considerations	301
4. Procedures and Practices	385
5. Protection Technologies	414
Part III Mitigation Measures	
1. Introduction	443
2. Emergency Planning and Training	449
3. Facility Siting and Layout	469
4. Detection and Warning Systems	487
5. Vapor Dispersion Modeling	504
6. Meteorological Instrumentation	528
7. Secondary Containment	542
8. Spray, Dilution, and Dispersion Systems	577
9. Foam Systems	615
10. Glossary	644
11. Metric (SI) Conversion factors	649
